REPORT

OF THE

SECRETARY OF INTERNAL AFFAIRS.

COMMUNICATION.

Department of Internal Affairs,
Harrisburg, *December 1, 1886.*

To His Excellency, Robert E. Pattison,
Governor of Pennsylvania:

In compliance with the requirements of the Constitution, I have the honor to present you herewith, for transmission to the General Assembly, reports of this Department for the year ending with the 30th ultimo, as follow:

Part I. Land Office.
Part II. Assessments.

I am, very respectfully,
Your obedient servant,
J. SIMPSON AFRICA,
Secretary of Internal Affairs.

181274

PART I.—LAND OFFICE.

REPORT.

DEPARTMENT OF INTERNAL AFFAIRS,
HARRISBURG, *December 1, 1886.*

To His Excellency ROBERT E. PATTISON,
Governor of Pennsylvania:

In obedience to the directions contained in acts of the General Assembly approved, respectively, the 2d day of April, 1811, and the 31st day of March, 1812, a report of the business performed in the Department within the year ending yesterday, together with the state of the Department during that period, is herewith made.

Money Received.

During the fiscal year ending with the 30th day of November, 1886, there was received in this Department, and paid into the State treasury, the sum of $5,733 51. Of this amount, $2,114 10 was for purchase money for lands and interest thereon; $710 94 for warrant and patent fees; $1,431 00 fees for certificates of service and certificates of qualification issued to anthracite mine foremen, and $1,477 47 fees received for copies of warrants, surveys, patents, and other documents, as will appear in the appended detailed statement.

STATEMENT

Showing the number of warrants, patents, and certificates to the State Treasurer, issued from December 1, 1885, to November 30, 1886, both days included, with the amount of purchase money, and fees for warrants, patents, &c.; also, copying fees received during the same period.

MONTH AND YEAR.	New warrants.	Patents paid for.	Excess tickets.	Certificates to State Treasurer.	Purchase money.	Warrant and patent fees.	Fees for certificates to mine foremen.	Copying fees.	Totals.
1885, December,	2	2		4	$55 92	$31 00		$204 91	$291 83
1886, January,	7	9	1	17	610 22	131 50		137 50	879 22

*Lien.

NOTE.—An act of the General Assembly, approved the 3d day of June, 1885, having changed the time for making quarterly returns to the Auditor General, from the dates previously fixed by law, to the first Mondays of July, October, January, and April, the copying fees received in the Department during the months of October and November, shown in the above statement, will not be turned into the State treasury until after the cleso of the current quarter, which will end with the 31st day of December inst.

DETAILED STATEMENT

of fees received for the year ending November 30, 1886.

540 copies of surveys,	$540 00
258 copies of patents,	258 00
165 copies of warrants,	82 50
78 searches,	19 50
58 connections, embracing 371 tracts,	278 25
43 copies of applications, and 170 miscellaneous copies,	299 22
53 warrants issued,	265 00
477 mine foremen's certificates issued,	1,431 00
Patent fees. including warrants of acceptance and other fees,	445 94
Total,	$3,619 41

Recapitulation.

Purchase money,		$2,114 10
Warrant and patent fees,	$710 94	
Mine foreman's certificate fees,	1,431 00	
Copying fees,	1,477 47	
		3,619 41
Total amount received,		$5,733 51

RESUME OF BUSINESS OF THE DEPARTMENT FOR THE YEAR ENDING NOVEMBER 30, 1886.

Letters Received and Answered.

3, 500 relative to land-office business.
1, 900 relative to industrial statistics.
500 relative to railroads and assessments.

Reports, Blanks, and Circulars Forwarded.

1, 500 relative to land-office business.
9, 500 relative to industrial statistics.
3, 000 relative to railroads and assessments.

Land-Office.

1, 832 copies of original papers certified and issued under the seal of the Department.
4, 500 searches for warrants and surveys, required for patenting, copying, and connections, and refiling the same.
2, 625 entries in fee-book, transcribing the same quarterly for settlement with the Auditor General.
4 quarterly returns to Auditor General.
58 applications for warrants received and entered on register.
43 applications for patents received and entered on register.
58 applications for warrants indorsed and filed.

43 applications for patents indorsed and filed.
53 tickets issued for warrants.
6 tickets issued for excess.
43 tickets issued for patents.
53 new warrants issued, recorded, registered, numbered, and filed.
53 new warrants issued and directed to county surveyors for execution.
46 new surveys from county surveyors, calculated and compared with warrants.
46 new surveys entered on surveyors' list of returns, numbered and filed.
8 new surveys containing an excess of land calculated, compared with warrants, and placed in excess files.
8 new surveys calculated, compared with warrants, and returned to county surveyors for correction.
43 entries on warrants or applications of the time of patenting.
43 indorsements on surveys of the time of patenting.
43 entries in warrant registers of the time of patenting.
102 calculations of sums due.
102 certificates of sums due directed to State Treasurer.
102 State Treasurer's receipts entered and delivered to the Auditor General.
102 vouchers written and entered in fee-book.
102 vouchers numbered and filed.
43 patents written, recorded, and indexed, embracing 5,800 acres of land.
14 satisfaction of liens entered on land-lien dockets.
14 certificates of liquidation of liens made out and forwarded to the prothonotaries of the several counties, under the act of the 4th day of April, 1868.
32 caveats entered, recorded on caveat-book, and filed.
29 citations issued, and noted on caveat-book.
86 surveys copied and certified under the act of 16th day of February, 1833.
12 monthly statements delivered to the Auditor General.

THE RECORDS AND BUSINESS OF THE DEPARTMENT.

Business communications are frequently addressed to this Departmen which should have been sent to some other branch of the State government and as often letters which should have been forwarded to this Department are, by mistake or misapprehension of the writers, mailed to some other office. For general information, the following synopsis of the records and business of this Department is reproduced from the report for last year:

I. The land office contains:

1. The records of patents granted in Pennsylvania by the Duke of York prior to 1681, and of the original grants made by the Proprietaries or the Commonwealth from 1681 until the present time. The

latter include applications, warrants, surveys, returns for patenting, patents, vouchers, and books of accounts.

2. Surveys of State and county lines, rivers, railroads, canals, State roads, turnpike-roads, plans of towns laid out by authority of the Proprietaries or the Commonwealth, and maps and reports relative to the erection of new counties.
3. Miscellaneous records of charters of incorporation, deeds, agreements, releases, and letters of attorney relating to lands.
4. The records of the Canal Commissioners' office, embracing surveys, maps, plans, contracts, minutes of the board, check-rolls, accounts, vouchers, and various other papers.
5. The records of the State Board of Centennial Managers for the International Exhibition of 1876, together with the register of visitors kept in the Pennsylvania State Centennial building.

II. Assessment returns made annually since and including the year 1875 by the boards of commissioners of the several counties and the board of revision of the city of Philadelphia, showing by assessment districts the valuation of taxable property, the amount of tax assessed, debt of county, etc.

III.

1. The Bureau of Industrial Statistics collects statistics in regard to the wages of labor and the social condition of the laboring classes; also, the productive statistics of agriculture, mining, manufacturing, commercial, and other business interests of the State.
2. The reports of the inspectors of bituminous mines, which are made to the Secretary of Internal Affairs, under an act approved the 18th day of April, 1877.
3. The reports of the inspectors of anthracite mines, each of which inspectors is required, by an act approved the 30th day of June, 1885, to "make an annual report of his proceedings to the Secretary of Internal Affairs of the Commonwealth, at the close of every year, enumerating all the accidents in and about the collieries of his district, marking, in tabular form, those accidents causing death or serious personal injury, the condition of the workings of the said mines, with regard to the safety of the workmen therein, and the ventilation thereof, and the result of his labors generally shall be fully set forth."

IV. Annual returns of railroad, canal, navigation, telegraph, and telephone companies doing business in the Commonwealth, showing their operations and affairs for the year, made under acts approved, respectively, the 4th day of April, 1859, and the 9th day of April, 1870.

The annual report of the Department consists of four parts, as follows:

I. LAND OFFICE includes the matters concerning lands and surveys, and the general business affairs of the Department for the State fiscal year, which ends with the 30th day of November. With it is bound:

II. ASSESSMENTS made during the year ending with the 1st day of June

III. Industrial Statistics for the calendar year. (The reports of the mine inspectors are included in this volume.)

IV. Railroads, Canals, and Telegraphs, compiled from the returns made by the several corporations for the calendar year.

The increase of population and rapid development of the material resources of the Commonwealth, the multiplication and extension of corporate and individual enterprises, and the consequent swelling of the ranks of the industrial classes among our people, have created a demand for the reports far greater than can be supplied from the limited number allowed the Department for distribution among those entitled to receive copies and the general public. A larger edition should be printed, or the present method of distribution should be abandoned and a better one substituted. The larger reports printed by the United States Government are distributed by the departments issuing them. The adoption of a similar plan would be more economical for the Commonwealth, and would better meet the approval of the people than the present system.

LIENS FOR UNPAID PURCHASE MONEY.

No action has been taken by the Board of Property to enforce the payment of the arrears of purchase money, interest, and fees due the Commonwealth on unpatented lands since the lien dockets were sent to the several counties; nor has the Board deemed it advisable to incur the expense of making out descriptive lists and having personal notice served upon the owners or occupants of such lands.

On the filing of the dockets in the offices of the prothonotaries of the several counties, the aggregate sum of principal and interest due on each tract became principal, and bears interest at the rate of six per cent. per annum. The Commonwealth has, therefore, lost nothing by the leniency of its officers. In many cases, the amount due is small, and does not warrant incurring the expense incident to the service of a personal notice; and in some instances, where notice has been served, it would have been oppressive to add the costs that would result from the collection of the arrearages by process of law.

Every purchaser of land should demand from the vendor evidence that it has been patented, or that the lien of the Commonwealth has been satisfied. By the exercise of such care, titles are perfected and the claims of the Commonwealth satisfied. A case recently came to light in one of the old settled counties, in which it was discovered that a farm that had been occupied for more than a century was not even warranted. It had been surveyed on an application, but no survey had been returned, and no purchase money paid. The purchaser of the farm required the production of a chain of title from the Proprietary, and, when an examination of the records of the Department was made, the facts as stated were disclosed.

At one period in the administration of the Land Office, as an inducement to holders of unpatented lands to perfect their titles, the law permitted patents to be issued on the execution of mortgages by the owner

to secure the balance of purchase money, interest, and fees due the Commonwealth. A number of such mortgages remain unsatisfied, and continue as liens upon the lands.

PATENTS FOR DONATION LANDS.

During the current term, many applications have been received from time to time for copies of patents granted for tracts of donation lands lying west of the Allegheny river, which could not be found on record in the Department.

People interested assume that, as a matter of course, all patents for land are recorded in the Land Office, and are surprised when informed that many of them are not on record here. These lands were a gift from the Commonwealth to the soldiers of the "Pennsylvania Line" in the war of the Revolution, and the act authorizing their appropriation for that purpose expressly states that a general map, upon which the numbers of the lots and the names of the persons for whom they were drawn shall be noted, shall be kept "as a public record, to serve, to all intents and purposes, in lieu of recording the patents; any law, custom, or usage to the contrary notwithstanding."

Many grantees, however, availed themselves of their right to have their patents recorded in the Land Office, and some others, after the passage of the act of the 14th day of March, 1846, caused the patents issued for their tracts to be placed upon record in the counties in which the lands are situated.

PAPERS OUT OF FILE.

When making searches for papers, of which copies had been applied for, it was discovered that many of them were out of file, and a complete overhauling of all the returns of surveys made to the Land Office since 1733 was therefore begun, and from time to time continued until the work was completed, in the early part of the past year. During this examination, 169 surveys were found to be misplaced. These were returned to their proper places on the files.

A few returns cannot be found, and they are supposed to have been lost or accidentally destroyed. Others, before the system of copying worn drafts into books was introduced, probably fell to pieces, and the fragments, of which there is quite a package, cannot be sufficiently identified to join them together. It is probable that in the hasty removal of the records of the Department in the summer of 1863, when a raid of the Confederate forces was imminent, some of these papers were lost.

BOARD OF PROPERTY.

The Board of Property held nine stated and special meetings during the year, at which 45 cases were heard.

A FIRE-PROOF BUILDING NEEDED.

From time to time, during the last thirty years, the attention of the General Assembly has been called to the fact that the building occupied by the

Department, and containing its valuable records, is not fire-proof. In my report for 1883, the subject was mentioned, and I feel that I should be unmindful of my duty if it were not again referred to.

The Commonwealth having succeeded to the rights and duties of the Proprietary in regard to the lands within its borders, and having voluntarily assumed the guardianship of the records of original titles, considerations of duty, as well as public policy, demand that it should place around these records such safe-guards as will prevent the possibility of their destruction by fire.

If the different counties deem their local records of sufficient importance to require fire-proof buildings for their preservation, should not the Commonwealth take proper precautions concerning the more ancient and valuable records of the Department of Internal Affairs?

The abandonment of stoves and the substitution of steam for heating purposes has lessened the danger from fire; nevertheless, in one notable instance during the administration of my immediate predecessor, the building, with its valuable contents, narrowly escaped destruction.

STATE BOUNDARY SURVEYS.

Final reports of the commissions to re-survey and re-mark the lines between this Commonwealth and the States of New York and West Virginia, were filed in this Department during the past year. Copies of these reports and some accompanying documents are appended hereto.

A resolution of the last General Assembly, approved the 7th day of May, 1885, directs the Secretary of Internal Affairs to cause the final reports of the re-surveys of the boundary lines of the Commonwealth to be printed. Delay in filing some of the documents concerning the survey of the New York lines has materially retarded the preparation of the general report, work on which has already been commenced by the State printer.

All of the boundaries of the Commonwealth defined by artificial lines have, within the last ten years, been carefully re-surveyed and plainly and permanently re-marked, excepting that portion of the Mason and Dixon line coterminous with the State of Maryland, and the circular line separating Pennsylvania from Maryland. More than a century has passed since these lines were traced by the surveyors chosen for that purpose, and the obliteration of the monuments by the destructive agency of the elements and the vandalism of man calls for a re-survey and re-marking before too many of the original marks shall have disappeared. A bill to authorize the appointment of a commission to re-survey the Maryland line and replace lost monuments thereon was introduced into the Legislature a few years ago, but failed to pass both houses.

The Commonwealth has been at considerable expense in the re-survey of the lines mentioned above. But it is believed that the astronomical work was skillfully performed, and that it has given results of observations of great value to science. It is also believed that the field duties of the engineers and surveyors employed on the lines were intelligently, as well as

artistically, executed, giving plainly defined and permanently marked boundaries, which, with proper care, will remain for centuries.

The duty of caring for the boundary monuments, erected at so much expense, should be committed to some officer of the State government, and provision should be made for their prompt restoration in case of their removal or destruction. The supervisors of roads of the border townships might be required periodically to inspect the boundary monuments, and report to the proper State officer any that may need re-adjustment or renewal.

A severe penalty should be prescribed by law for the wanton or malicious removal, destruction, or defacement of the monuments erected by direction and authority of the several joint boundary commissions.

REPORTS OF SURVEYS OF STATE AND COUNTY LINES.

Under the provisions of the act of the 8th day of May, 1876, this Department became the depository of all maps, drafts, reports, and other papers, then remaining in the office of the Secretary of the Commonwealth, relating to surveys of State and county lines, State and turnpike roads, railroads, canals, and other public improvements. The same act makes it the duty "of all commissions appointed to re-survey, re-mark, alter, or change any county line to deposit duplicate copies of their report in the office of the clerk of the court of quarter sessions of the proper county; and, after the same has been confirmed by said court, the said clerk shall, upon one of the copies, certify such confirmation, and immediately transmit the same, by mail, to the Secretary of Internal Affairs, to be by him deposited in his Department."

The attention of the clerks of the courts of quarter sessions, and all others interested, is called to the duties under this act and to the importance of a compliance therewith, so that the State records relating to county lines may be complete.

Reports, maps, etc., have been filed in the Department during the past year as follows, to wit:

Pennsylvania and West Virginia.

No. 94. Report of the Joint Commission. Filed July 10, 1886.

No. 95. Report of C. H. Sinclair on Survey of the Parallel Boundary. Filed July 10, 1886.

No. 96. Map of the line from the south-west corner of Pennsylvania to the Maryland corner. Filed July 10, 1886.

No. 97. Map of same showing old marks and tangents by which the line was traced; also theoretic curve through the south-west corner of Pennsylvania and new monuments. Filed July 10, 1886.

Pennsylvania and New York.

No. 98. Final Report of the Pennsylvania Commissioners. Filed June 30, 1886.

No. 99. Agreement between the Commissioners of the two States. Filed June 30, 1886.

No. 100. Field Book of the Reconnaissance, with Memoranda of the Various Monuments. Filed June 30, 1886.

No. 101. Record of the Monuments set upon the Line, 1881–1885. Filed June 30, 1886.

No. 102. Map of the Line along Wayne county. Filed June 30, 1886.

No. 103. Map of the Line along Susquehanna county. Filed June 30, 1886.

No. 104. Map of the Line along Bradford county. Filed June 30, 1886.

No. 105. Map of the Line along Tioga county. Filed June 30, 1886.

No. 106. Map of the Line along Potter county. Filed June 30, 1886.

No. 107. Map of the Line along McKean county. Filed June 30, 1886.

No. 108. Map of the Line along Warren county. Filed June 30, 1886.

No. 109. Map of the Line along Erie county. Filed June 30, 1886.

No. 110. Map of the Meridian Line along Erie county. Filed June 30, 1886.

No. 111. Diary of Operations, Boundary Survey, 1877–8, Vol. 1. Filed September 16, 1886.

No. 112. Diary of Operations, Boundary Survey, 1877–80, prepared for Colonel James Worrall, President of the Joint Commission. Filed September 16, 1886.

No. 113. Memoranda made by Colonel James Worrall in reference to the Commission. Filed September 16, 1886.

No. 114. Report of Expenditures, appropriation of July 5, 1883. Filed September 16, 1886.

No. 115. Report of Expenditures, appropriation of June, 1885. Filed September 16, 1886.

No. 116. Letter of Robert N. Torrey, one of the Commissioners on the part of Pennsylvania, transmitting Reports of Expenditures. Filed September 16, 1886.

BUREAU OF INDUSTRIAL STATISTICS.

In the execution of the varied duties devolving upon the Secretary of Internal Affairs during the current term, efforts have been made to extend the scope of the Bureau of Industrial Statistics and increase its usefulness to the working classes, whom it was primarily intended to benefit. Evidence of the measure of success attained is best seen in the demand for the report of that branch of the Department, (Part III, Industrial Statistics,) which far exceeds the number of copies allowed by law to be printed.

The number of people that may be classed as our industrial population, and who are interested in the work and results of this Bureau, is now so great, and the industries of the Commonwealth are so numerous and so

diversified in character, that it is impossible to give, in the annual reports, that comprehensive showing of the condition of the laboring people and of the industries that their importance demands without swelling the volume to an unwieldy size.

Personal visitation, either by the chief or authorized deputies, is necessary to enlist the interest of the people concerned, to dispel their natural aversion to communicating what seems to be private affairs, and to secure full returns of the information sought.

The amount appropriated for the collection of statistics and to enable the Bureau to execute its mission is insignificant, when compared with appropriations for similar purposes made by other States of far less industrial importance.

ASSESSMENT REPORTS.

The law of the 15th day of May, 1874, fixes the first day of June as the time at which the county commissioners shall make and forward to this Department annual assessment returns.

Every year during the present term the preparation of the report of the Department has been delayed by the delinquency of one or more of the boards of commissioners. The act mentioned provides a method for enforcing the making of returns, but the Department has thus far refrained from resorting to coercive measures. In some instances where it was apparent that unavoidable circumstances prevented the making of the returns on the day fixed by law, extension of time was granted, but hereafter the boards of commissioners should see that their duty in this matter is promptly performed.

The assessments for 1886, compared with those for 1885, exhibit an increase of 28,737 in the number of taxables in the State; of $79,735,024 in the value of real estate taxable; of 12,050 in the number of horses and mules over four years of age, and of $5,068,563 in their value; of 36,774 in the number of neat cattle, and of $505,710 in their value; of $2,459,087 in the value of household furniture; of 25,589 in the number of pleasure carriages, and of $1,097,271 in their value; of $82,327,553 in the aggregate value of all property taxable for county purposes; of $573,793 02 in the aggregate amount of county tax assessed; of $207,752,270 in the amount of money at interest, including mortgages, judgments, bonds, notes, stocks, etc.; of $6,703 68 in the amount of State tax assessed on pleasure carriages; of 6,423 in the number of gold lever, 10,615 in the number of silver lever, and 14,656 in the number of common watches; of $18,660 61 in the amount of State tax assessed on all watches, and of $525.282 36 in the aggregate amount of State tax assessed. They also exhibit a decrease of $1,057,895 in the value of salaries and emoluments of office, professions and occupations, and of $5,988,848 21 in county debts.

The most considerable changes in the returns of taxables are to be found in the following counties: Allegheny, a decrease of 17,687; Lackawanna, a decrease of 3,995; Philadelphia, an increase of 27,249; Luzerne, an in-

crease of 2,360; Cambria, an increase of 1,716; Somerset, an increase of 1,593; Dauphin, an increase of 1,410; Montgomery, an increase of 1,374; Northampton, an increase of 1,330; Lycoming, an increase of 1,285; Schuylkill, an increase of 1,238; Columbia, an increase of 1,055; Carbon, an increase of 928; and Delaware, an increase of 904. It would be misleading to suppose that these changes in the returns represent actual changes in the number of taxables in these counties. In the main they represent imperfections in the assessments, owing, perhaps, not so much to laxity on the part of assessors, as to indifference on the part of citizens who are not owners of property. Allegheny certainly did not lose 17,687 taxables from 1885 till 1886, and Philadelphia certainly did not gain 27,249 in the same period. If accurate returns of taxable inhabitants could be obtained from all our counties every year, it would be possible to compute from them, with reasonable accuracy, the annual advance of the State in population. In like manner, full and accurate assessments of all descriptions of property, including bonds, stocks, money at interest, &c., at their real value, would exhibit the wealth of the State and the annual increase thereof.

An act of Assembly, approved the 13th day of June, 1883, made it "the duty of the several assessors in this Commonwealth, in their return of real estate to the commissioners of the proper county, at the next triennial assessment, and at each triennial assessment thereafter, to make return of all timber land in their proper district by specifying, in separate columns, how many acres each tract contains of cleared land and how many in timber." Columns for these classes of land were provided in the blanks sent out from this Department to the commissioners of the several counties for the returns of 1886. Forty-four counties made returns of cleared and timber land, one of cleared land only, and four of timber only, whilst eighteen made no return of either. The omissions are to be regretted, as they detract seriously from the value of these interesting statistics. Where the omissions are only partial, as in Centre, which reports her cleared land, and in Cumberland, Lancaster, McKean and Montgomery, which report their timber, this department has found it practicable to complete the returns by subtracting the cleared land from the total area of Centre, and the timber from the total area of each of the other counties above mentioned. The tabulated statement on page 290 (B) has been corrected to this extent. It foots up 12,947,320 acres of cleared land and 7,188,517 of timber. Total returned 20,135,837, which being deducted from 28,808,443, the area of the State in acres, leaves 8,672,606 acres unreturned and beyond the power of this Department to classify. Perhaps two-thirds of this unreturned area is timber land.

Omissions in other columns than those devoted to cleared and timber land are observable in the returns of various counties. They detract from the value of these statistics, and will probably not be cured without compulsory laws rigidly enforced. The column of real estate exempt from taxation is specially defective, twenty counties having failed to fill it; and the

total of the column of salaries and emoluments of office, professions, trades, and occupations, suffers greatly on account of the absence of returns from Philadelphia and Lancaster. Philadelphia did not report the number of her horses, mules and cattle, though she reported their value. Lackawanna and Lancaster did not report money at interest, &c., and Juniata and Lancaster omitted to report the value of property taxable for State purposes. Lancaster, the most important county in the State except Philadelphia and Allegheny, made the most meagre report of any, and her commissioners, through their official representative, declined to make it fuller when requested by this Department.

The heavy increase in the return of money at interest, including mortgages, judgments, bonds, notes, stocks, &c., is attributable to the comprehensive and stringent provisions of the act of Assembly approved June 30, 1885.

The aggregate of county debts reported for 1886 is $64,165,499 71, against $70,154,347 92 in 1885, an apparent decrease of $5,988,848 21. Twenty-nine counties reported no debts in 1885, and twenty four report no debts in 1886.

PATENT INDEXES.

The work of re-indexing the patent books, commenced under the administration of General William McCandless, was completed during the past year. A part of the plan was to transcribe the separate indexes into a general one, but the current duties of the Department did not permit of its execution.

GEODETIC SURVEY.

An account of the progress of the Geodetic Triangulation in the Commonwealth, published last year, is reproduced in this volume, with the addition of a description of the method employed and of the results of the survey during the year. This information was furnished by Professor Mansfield Merriman, acting assistant, by permission of the Superintendent of the United States Coast and Geodetic Survey.

MAGNETIC MERIDIAN CIRCULARS.

In view of the large amount of space that the State boundary and other reports would probably occupy in the report of the Department, the usual circulars on the subject of the declination of the magnetic needle were not sent out last year. A table of results, compiled from the returns made during former years, will be found on subsequent pages.

RAINFALL.

In the report of the Department for 1884, there was published an article on rainfall, written by John Torrey, Esq., of Honesdale, and tables of results of observations made at Pittsburgh during that year.

Appended hereto is a communication entitled "Rainfall at Bethlehem, Pa.," copied from the Journal of the Engineering Society of Lehigh University, giving the results of observations there during the last nine years.

As this may be the last official communication incumbent upon me to make before transferring the duties of office to my successor, I take pleasure in bearing testimony to the fidelity of the officers, clerks, and employés of the Department, and to their willingness, at all times, to forward the discharge of public duties.

Respectfully submitted.

J. SIMPSON AFRICA,
Secretary of Internal Affairs.

MAGNETIC DECLINATION.

UPPER STRASBURG, FRANKLIN CO., PA., *December 18, 1886.*

Hon. J. SIMPSON AFRICA,

Secretary of Internal Affairs.

DEAR SIR: I herewith send you the result of my observations of the declination of my needle at the county meridian, as well as at my private meridian at home. Declination at county meridian, at 10.40, A. M., April 27, 1886, weather cloudy and cold, 3° 57′ west. Progression since last year 3.5′. October 1, 1886, on same line, cold and stormy, at 3 P. M., 3° 55½′. Change since 1852, 2° 18′; yearly change, 4.06′.

Engineer or Surveyor.	Kind of Instrument.	Date.	Hour of day.	State of the weather.	Declination.	Remarks.
A. S. Winger, .	Gurley vernier compass.	April 7, 1886,	11 A. M. .	Cloudy, snowy,	4° 15′	Telescopic sight, vernier single minutes.
Jas. D. McDowell	Draper vernier compass	April 13, 1886	. . .	. . . . .	4° 00′	Vernier reads to five minutes.
F. J. Pfoutz,	Heisely plain compass.	April 20, 1886,	11 A. M. .	. . . . .	3° 50′	Fractions of degree estimated.
A. G. Kaufman,	Plain compass.	April 20, 1886,	11 A. M. .	. . . . .	4° 00′	Not same instrument tested last year.
A. B. Stoler, . .	Gurley surveyors tran.	April 23 1886	11 A. M.	Fair and warm,	4° 15′	Vernier to single minutes.
A. Buchanan, .	Gurley surveyors tran.	April 23, 1886,		Fair and warm,	3° 30′	Vernier to single minutes.
Jno. B. Kaufman	Gurley solar transit.	April 27, 1886,	10.40 A. M.	Cloudy & cold,	3° 57′	Vernier to single minutes.
Jno. R. McElroy,	Gurley vernier compass	April 27, 1886,	11 A. M. .	Cloudy & cold,	3° 52′	Vernier to single minutes.
Jno. W. Kuhn,	Young vernier compass	April 27, 1886,	11.10 A. M.	Cloudy & cold,	3° 58′	Vernier to five minutes.
Geo. M. Stenger,	Gurley plain	April 28, 1886,	10.30 A. M.	Slightly cloudy,	4° 00′	No vernier.
Jno. B. Kaufman	Gurley solar compass.	Oct. 1, 1886,	3 P. M. .	Cold and windy,	3°55′30″	Same as above observation.

Average of ten instruments in April tests, 3° 57′ 42″. Average of eleven observations including October test, 3° 57′ 30″. Average of ten instruments taking mean of two observations, 3° 57′ 37.5″. Four instruments, tested both years, show a decrease in declination; three an increase. The remainder, not having recorded any tests last year, could not be compared.

On my own meridian at home, the general average of twenty observations (ten direct and ten reversed) for 2.40, P. M., April 6, 1886, gave 3° 56′ 13.5″. Weather damp and cold. On same line, June 4, 1886, from half past 6 till half past 7, A. M., same number gave 3° 44′ 46″. On same line, June 4, 1886, at 11 A. M., five observations gave 3° 51′ 24″. On same line, June 4, 1886, at 2, P. M., eleven observations gave 3° 58′ 54″, giving an average of 3° 51′ 41⅓″ for the whole day; but as these results were not given their respective weights, the true result would differ slightly from the average result as above.

The fluctuation in the movements of the needle noticed by observer during the last few years, have been as remarkable for their frequency as for the suddenness and violence of the disturbances, and these phenomena have

been and are by no means confined to a limited area. Many needles having appeared to retrograde during the last year or two, it is the opinion of some surveyors that we have perhaps arrived at the epoch of extreme westerly digression, and the needle has started on its eastern journey as it did some two hundred years ago. I do not yet think we have reached that era, but look upon this apparent halt as temporary, and expect, with a good deal of confidence, that after a few years, perhaps, the needle will resume its westward course, though more slowly than during the last few decades, and with a gradually diminishing rate for quite a while before reaching its maximum western digression. It will be remembered that from 1879 till about 1883 the annual change was unusually large, considerably larger than the theoretic average, when the rate should have been diminishing instead of increasing; now it seems to have almost ceased, and, in fact, some instruments show even a retrograde motion. This seems to me to show that the needle is subject to secondary influences besides that which causes the secular variation. These influences, whatever they are, seem also to be periodic in their manifestations, though limited both in duration and extent. Sometimes, like the period from 1879 to 1882 or 1883, but especially during 1880–1–2, they move in the same direction as the secular motion, and *increase* the annual change; for some years they seem to neither advance nor recede, and the secular change is but little disturbed; then again they operate in the opposite direction for a time, and greatly reduce, and possibly hide, the secular variation until the point of culmination is passed, when the general or forward movement becomes apparent. Are we not passing through such a period as to show a cessation of the forward movement now? As already intimated, there may be several minor influences at work at the same time, complicating the whole subject so as to render its practical solution extremely difficult. Hence it may be unsafe to hazard a prediction of the future movements of the needle, yet, judging from its performances in the past, I would venture to say that it is more than likely that the needle will continue to move on in a jerking hop-step-and-jump sort of way towards the west for many years to come; then it may take a good, long, but quivering rest, lasting some years, and *then* slowly and hesitatingly return eastward, sometimes halting, as if uncertain whether to go westward again; then take a jump eastward, but finally gaining more momentum, proceed on its long journey towards the rising sun. But *we will not be here* to see it. The young beginner, who now builds his air-castles and sees before him a roseate future, as we did thirty-five or forty years ago, in retracing lines during the next twenty or thirty years, in all probability will have to *increase* from year to year his allowance for variation. He will long ago have thrown aside his second-hand plain compass, and heavy, bent, and worn chain, for a telescope compass or transit, and a steel tape or other measuring instruments of precision; the constitutionally tired and careless chainman, will, I sincerely hope, have been supplanted by careful, experienced, and intelligent chainbearers; or, what would be much

better, that triangulation and calculation of the distances will have dispensed with chaining altogether, and corners will be marked with monuments of substantial materials, permanently placed and easily distinguishable, instead of the traditionary half-rotten rail piece, pointed or unpointed, and so loosely set as to be knocked out in less than twenty-four hours. The young and hopeful surveyor of to-day will, more than likely, find his head silvered with the frosts of age, his joints stiffened with rheumatism, contracted by years of exposure in the discharge of his professional duties, and while the needle *was still going westward*, before the needle will be ready to "turn about and wheel about" and start on its eastward journey.

It may be urged that the hidden elements which affect the needle are so uncertain that speculation as to its behavior in the future is idle, and that the surveyor has more to do with the past than the future. That may be true, and it may be that the future may disclose entirely unexpected events. The methodical, laborious, and gifted investigator of magnetic phenomena, Professor Schott, is apparently less willing to venture into the future than he appeared to be thirty years ago, and yet it is doubtful whether any living man has collected more valuable statistics or information relating to this interesting subject than he. And these results have been obtained, in a large degree, by carefully conducted observations with the most delicate and refined instruments of precision that modern ingenuity could design or construct. Still the future reaches so closely to the present, and the present so rapidly becomes the past, that we are somewhat concerned with the future, too, and its probable manifestations. The able general, by all means at his command, endeavors to understand the plans of his antagonist, to learn what he means to do. Certainly it is of the first importance to find out, if he can, what the enemy has already done; but if he would successfully counteract and frustrate his plans, he should seek to understand those plans and then act accordingly. Perhaps there is no more difficult problem the surveyor has to combat or solve than the uncertainties caused by the vagaries of the needle. Says one, "Why not abandon the use of the needle altogether?" This would help us out of the difficulty at *one* end only. I would be in favor of doing so, however. But if we were to abandon or abolish the needle to-morrow, the other half of the difficulty would remain still. We must not disturb vested rights. We must endeavor to find where the old line (run by the magnetic needle) *was* run, and where the old corner had been, not where it should have been. The line was run say in 1840 by the magnetic bearing. The azimuth from the astronomical north differs from the bearing given. This difference, whatever it is, must be allowed, no matter by what method you survey. If original marks remain and can be identified, you will be governed by them, and probably will have found the variation. But often there are no marks of line or corner. Then there may be fences recognized as the boundaries. If the fence is straight, *it* may answer. But if there are neither fences nor marks, and the owners disagree as to the locality, what then? Is it not evident that the surveyor,

in a case like this, ought to know the amount of declination in 1840, and allow it in running his line? It is not a difficult problem, mathematically, with a good instrument and accurate chainmen, to lay out a tract of exactly the shape and size as called for in the draft and deed, but to lay it down—to orient it—so as to harmonize with the old lines, is quite a different matter. Hence I cannot see how we are to ignore the variation of the needle and restore lost corners successfully. I do not pretend to say that even by making the allowances with the best judgment and skill, we will find the original spot, for that is well nigh impossible. There are too many elements of error to claim for such work entire certainty, but with a good knowledge of the subject, and judicious application of that knowledge, the error from the truth will be as small as by any method that I know of, and as likely, all things considered, to give satisfaction in the greatest number of cases. A want or disregard of this knowledge in running old lines I know has often led to grossly inaccurate work and disastrous consequences, and I feel certain hundreds of our best surveyors will agree with me.

My views as to reforms have been so often stated that I deem it superfluous to repeat them. They remain unchanged, and I refer to former reports as to their import.

I am, yours very truly,

John B. Kaufman,
County Surveyor, &c.

DECLINATION OF THE MAGNETIC NEEDLE.

Table of Results.

[REMARKS.—A common source of error, overlooked by most engineers and surveyors, and one to which many of the differences in the readings of needle instruments may be attributed, is that the meridian of the graduated compass-box does not coincide with the line of sight. This error can be corrected only by the instrument-maker, and should be avoided before any instrument leaves the manufactory.—J. S. A., *Sec. Int. Aff.*]

[On the 18th day of August, 1885, a series of observations were made in the capitol grounds by an assistant of the U. S. Coast Survey for the purpose of ascertaining the declination. The result was found to be 5° 21′ W.—J. S. A., *Sec. Int. Aff.*]

PENNSYLVANIA AND NEW YORK BOUNDARY SURVEY.

Report of Expenditures of Appropriations.

HONESDALE, PA., *September 1, 1886.*

HON. J. SIMPSON AFRICA,

Secretary of Internal Affairs:

DEAR SIR: As required by the third section of the act entitled "An act in regard to the boundary monuments on the line between the States of Pennsylvania and New York," with an appropriation for the expense of the same, I have the honor to transmit to you an account of the expenditure of the appropriations of July 5, 1883, and June, 1885, respectively, with the vouchers for the same.

Very respectfully,

Your obd't serv't,

ROBERT N. TORREY,

Commissioner.

THE COMMONWEALTH OF PENNSYLVANIA, *on account of the New York and Pennsylvania Boundary Commission,*

TO JAMES WORRALL,

1883.	DR.		
	To amount paid R. N. Torrey, Commissioner,	$100	00
	To amount paid advances made by the New York Commission,	2,772	81
	To amount paid N. Y., L. E. & W. R. R., freight,	147	02
	To amount paid expense account, July, 1883. July, 1884,	2,891	24
	To amount paid H. W. Clarke, account April, 1880,	30	61
	To amount paid H. W. Clarke, account May, 1880,	40	77
	To amount paid C. M. Gere, Commissioner,	1,508	29
	To amount paid James Worrall, Commissioner,	500	00
	To amount paid James Worrall, (short in his cash account,)	9	26
		$8,000	00
	CR.		
July 9.	By amount received from State Treasurer, $4,000 00		
Aug. 2.	By amount received from State Treasurer, 4,000 00		
		$8,000	00

On account of the death of Colonel James Worrall, his report of expenditure under appropriation of July 5, 1883, was never rendered.

I certify that the above is a correct account of the expenditure of the appropriation of July, 1883, as found in the books and papers of the late James Worrall, and that vouchers are filed with this account in the office of the Secretary of Internal Affairs, in Harrisburg, for all the items except

$509 26, which is charged to James Worrall on his cash account and for which he left no voucher.

ROBERT N. TORREY,
Commissioner.

July 24.	By draft from Auditor General for amount of appropriation of June, 1885,	3,000	00
	Balance due Robert N. Torrey,	$381	73

I certify that the above is a correct account of the expenditure of the appropriation of June, 1885, and that vouchers for all the items are filed with this account in the office of the Secretary of Internal Affairs, in Harrisburg; and that there is due me a balance of three hundred and eighty-one $\frac{73}{100}$ dollars ($381 73) for services rendered.

ROBERT N. TORREY,
Commissioner.

HONESDALE, *July 13, 1886.*

Filed in the Department of Internal Affairs of Pennsylvania, September 16, 1886.

J. SIMPSON AFRICA,
Secretary of Internal Affairs.

Agreement Between the Commissioners Appointed by Pennsylvania and New York.

An agreement made the twenty-sixth day of March, in the year eighteen hundred and eighty-six, between Henry R. Pierson, Elias W. Leavenworth, and Chauncey M. Depew, Commissioners on the part of the State of New York, and Christopher M. Gere and Robert N. Torrey, Commissioners on the part of the State of Pennsylvania:

WHEREAS, By the first section of chapter four hundred and twenty-four, of the laws of the State of New York for the year 1875, the regents of the

University of the State of New York were authorized and directed to resume the work of "examination as to the true location of the monuments which mark the several boundaries of this State," as authorized by the resolution of the Senate of April 19, 1867, and in connection with the authorities of Pennsylvania, to replace any monuments which may have become dilapidated or been removed on the boundary line of that State;

And whereas, The said board of regents of the University did, through a committee of said board previously appointed for the purpose under said Senate resolution of 1867, proceed to carry out the instructions contained in said chapter four hundred and twenty-four of the laws of 1875;

And whereas, By chapter three hundred and forty of the laws of the said State of New York, for the year 1880, the said regents of the University were further authorized and empowered to designate and appoint three of their number as commissioners, to meet such commissioners as may have been or may be appointed on the part of the State of Pennsylvania, and with such last-named commissioners, as soon as may be, to proceed to ascertain and agree upon the location of the boundary line between said States as originally established and marked with monuments, and in case any monuments are found dilapidated or removed from their original location, to replace them in a durable manner in their original position, and to erect such additional monuments at such places on said lines as they may deem necessary for the proper designation of the boundary line between said States;

And whereas, The above-named Henry R. Pierson, Elias W. Leavenworth, and Chauncey M. Depew, were, by resolution passed on the thirteenth day of July, 1880, duly designated and appointed by the said regents of the University of the State of New York, as Commissioners on the part of the State of New York, for the purposes mentioned in said act; and

Whereas, Also, by an act of the Legislature of the State of Pennsylvania, entitled "An act in regard to the boundary monuments on the line between the State of Pennsylvania and New York, with an appropriation for expenses of the same," passed May 8, 1876, the Governor of the State of Pennsylvania was authorized and empowered "to appoint three persons to be a commission, to act in conjunction with a similar commission of the State of New York, to examine as to the true location of the monuments which mark the boundary line between this State and the State of New York, and in connection with said commission of the said State of New York, to replace any monuments which have become dilapidated or been removed on the boundary line of said States;"

And whereas, The Governor of the State of Pennsylvania, under authority of said act, did duly designate and appoint James Worrall, Christopher M. Gere, and Robert N. Torrey, to be a commission for the purposes of said act;

And whereas, James Worrall, the first-named member of said commission, died during the progress of the work on said boundary line, to wit: on

April 1, 1885, and the surviving members, to wit: Christopher M. Gere and Robert N. Torrey, have continued the work of said commission, on the part of the State of Pennsylvania, as authorized by the aforesaid act;

Now, therefore, the said commissioners, for and on behalf of their respective States, having duly performed the duties imposed upon them by the said acts, and having examined said boundary line, and replaced in a durable manner the monuments to mark the same, in pursuance of the authority duly given as aforesaid, have agreed, and do hereby agree, as follows:

First. The channel of the Delaware river from a line drawn across said channel, from a granite monument erected upon the eastern bank of said river, in the year 1882, by the joint boundary commission of the States of New Jersey and New York, to mark the western extremity of the boundary line between said States of New Jersey and New York in a westerly prolongation of said boundary line, up and along said channel of said Delaware river as it winds and turns, for a distance of eighty-five miles, or thereabouts, to a line drawn east across said river, from a granite monument erected upon the west bank of said river in the year 1884, by H. W. Clarke and C. M. Gere to mark the eastern extremity of the first line hereinafter described, shall continue to be a part of the boundary or partition line between the said two States: *Provided, however*, That the limit of territory between the said two States shall be the center of the said main channel: *And provided further*, That each State shall enjoy and exercise a concurrent jurisdiction within and upon the water of said main channel between the lines of low water at either bank thereof, between the limits hereinbefore mentioned.

Second. The line extending from the Delaware river aforesaid, at a point upon said river, fixed and marked with monuments, (which have since disappeared,) by David Rittenhouse and Samuel Holland, in the month of November, in the year 1774, west as the same was surveyed, and marked with monuments, in the year 1786 as far as the ninetieth milestone, by James Clinton and Simeon DeWitt, Commissioners on the part of the State of New York, duly appointed for that purpose by the Governor of said State, in pursuance of an act of the Legislature of said State, entitled "An act for running out and marking the jurisdiction line between this State and the Commonwealth of Pennsylvania," passed 7th March, 1785, and David Rittenhouse, Andrew Porter, and Andrew Ellicott, Commissioners on the part of the Commonwealth of Pennsylvania, duly appointed for that purpose by the Supreme Executive Council of said Commonwealth, in pursuance of an act of the General Assembly of said Commonwealth, entitled "An act to authorize and enable the Supreme Executive Council to appoint commissioners, to join with the commissioners appointed, or to be appointed, on the part of the State of New York, to ascertain the northern boundary of this State from the river Delaware westward, to the northwest corner of Pennsylvania," passed 31 March, 1785; and from the said

ninetieth milestone, west, as the same was surveyed, and marked with monuments and posts in 1787 by Abraham Hardenburg and William U. Morris, Commissioners on the part of the said State of New York, duly appointed in the place of Simeon DeWitt and James Clinton aforesaid, by the Governor of said State, in pursuance of the act aforesaid, and the act supplementary thereto, passed by the Legislature of said State, 21 April, 1787, and Andrew Ellicott and Andrew Porter, aforesaid Commissioners on the part of the Commonwealth of Pennsylvania, to the point at which said line is intersected by the line of cession or meridian boundary hereinafter described, which said line, so surveyed and marked in the years 1786 and 1787, has since been acknowledged and recognized by the said two States, as a part of the limit of their respective territory and jurisdiction, shall, notwithstanding any want of conformity to the verbal description as written in the charter of the Province of Pennsylvania, granted to William Penn in the year 1682, or as recited by the Commissioners aforesaid, continue to be the boundary or partition line between the said two States, from the Delaware river aforesaid, to the said point of intersection with the said line of cession: *Provided*, That wherever upon said line, the locations of any of the monuments or posts erected by the said Commissioners in 1786 and 1787 have been lost and cannot otherwise be definitely fixed, then, and in that case, and in every case where it is required to establish intervening points in said line, a straight line drawn between the nearest adjacent monuments whose localities are ascertained shall be understood to be, and shall be, the true boundary line.

Third. The line of cession, described as a meridian line, drawn from the forty-fifth degree of north latitude, south through the most westerly bent or inclination of Lake Ontario, in the deed of cession to the United States of certain territory claimed by the State of New York, lying west of said line executed 1 March, 1781, by James Duane, William Floyd, and Alexander McDougall, delegates in Congress of said United States from the said State of New York, in pursuance of an act of the Legislature of said State, entitled "An act to facilitate the completion of the articles of confederation and perpetual union among the United States of America," passed 19 February, 1780, which said territory was afterward conveyed by the United States aforesaid to and became a part of the territory and jurisdiction of the said Commonwealth of Pennsylvania, as the said line was surveyed and marked with posts and monuments of stone in the year 1790 by Andrew Ellicott, who was duly appointed for that purpose by the President of the United States, in pursuance of a resolution of Congress, passed 19 August, 1789, which said line, and its prolongation due north into the waters of Lake Erie, until it intersects the northern boundary of the United States aforesaid, have since been acknowledged and recognized by the said two States as a part of the limit of their respective territory and jurisdiction, shall, notwithstanding any possible want of conformity to the verbal description thereof, as contained in said deed of ces-

sion, continue to be the boundary or partition line between the two said States so far as said line so surveyed and marked in 1790 shall extend.

Fourth. The monumental marks by which the said boundary line, except such portions thereof as may lie within the waters of the Delaware river and Lake Erie, shall hereafter be known and recognized, are hereby declared to be :

I. The original monuments of stone erected in the years 1786 and 1787 by the commissioners aforesaid, and in the year 1790 by Andrew Ellicott aforesaid, as the same have been restored and reëstablished in their original positions, or have been replaced by granite monuments, erected in the years 1881, 1882, 1883, 1884, and 1885 by H. Wadsworth Clarke, surveyor on the part of New York, and Christopher M. Gere, surveyor on the part of Pennsylvania, duly appointed by the parties hereto.

II. The new monuments of granite, erected in the years 1881 to 1885 inclusive, by the aforesaid surveyors at intervals of one mile, more or less, and numbered consecutively along said line originally surveyed and marked in the years 1786 and 1787, beginning from the Delaware river; and severally marked on the north side with the letters "N. Y.," and on the south side with the letters "PA," and along said line originally surveyed and marked in the year 1790, beginning at the shore of Lake Erie, and severally marked on the east side with the letters "N. Y.," and on the west side with the letters "PA."

III. The new monuments of granite, erected by the said surveyors in the years 1881 to 1885 inclusive, aforesaid, at intervening points on said line, and at its intersection with public roads, railroads, and rivers, and at other points, and severally marked on the one side with the letters "N. Y.," and on the other side with the letters "PA."

IV. A large monument of granite, erected in the year 1884, by the said surveyors, 600 feet west of the center of the Delaware river, in the said line originally fixed in the year 1786, to mark the eastern terminus. A large monument of granite, erected in the year 1884, by the said surveyors, in the said line or meridian boundary as originally fixed in the year 1790, 100 feet north from its intersection with the line originally surveyed as aforesaid, in the year 1787, which said point of intersection is marked by a small monument of granite buried in the center of the highway in 1884, by the said surveyors. And also a large monument of granite erected in the year 1869 by John V. L. Pruyn, George R. Perkins, Samuel B. Woolworth, and George W. Patterson, on the part of the State of New York, and William Evans, on the part of the State of Pennsylvania, 440 feet south of the original monument erected in the year 1790, by Andrew Ellicott aforesaid, upon the south shore of Lake Erie, in the line originally surveyed and marked by him, as aforesaid.

V. The field book of said surveyors, containing the notes of the resurveys along said line in the years 1877, 1878, and 1879, also the "record of monuments" prepared by said surveyors, containing the descriptions of

the locations of the several monuments erected by them, and of the witness marks thereto; also the maps of said line and the vicinity thereof, showing the locations of said monuments; and also the "diary of operations" of said surveyors, under the direction of the parties hereto, the same having been duly authenticated by the signatures of the said surveyors and the several documents and books of record containing the transactions of the parties hereto, all of which being placed on file in the office of the Secretary of State of New York, and the office of the Secretary of Internal Affairs of Pennsylvania, shall constitute the permanent and authentic records of said boundary line, and are hereby adopted by the parties hereto, and made a part of this agreement.

VI. This agreement shall become binding upon the two States when ratified by the Legislatures thereof respectively, and when confirmed by the Congress of the United States.

In witness whereof, the said Commissioners have hereunto set their hands and seals, in duplicate, the twenty-sixth day of March, 1886, aforesaid.

Executed in the presence of witnesses.

J. Simpson Africa,
Secretary of Internal Affairs.

Final Report of the Commissioners Appointed on the Part of Pennsylvania.

Honesdale, *June 1, 1886.*

Honorable J. Simpson Africa,

Secretary of Internal Affairs:

Dear Sir: As required by the third section of the act entitled "An act in regard to the boundary monuments on the line between the States of Pennsylvania and New York, with an appropriation for the expense of the same," approved the 8th day of May, 1876, we have the honor to transmit to you the final report of the joint commission appointed by authority of said act, with extracts from the report of the surveyor to the joint commission. The full report of the surveyor was not adopted by the joint commission, as much of it was apparently prepared as a statement, from a New York stand-point, of the former controversies relating to this bound-

ary, and other portions had no reference whatever to the work of our commission.

Accompanying the surveyor's report are the following documents, &c.:

I. A field book of the reconnaissance, with memoranda of the various monuments.

II. A record of monuments, classified by counties, giving minute description of all the new monuments and their location, with data for their ready identification.

III. A series of maps by counties, showing the location of the new monuments.

IV. A diary of operations from 1877 to the close of the work.

A report of the expenditures, with vouchers for the same, will be made to you in a short time.

Very respectfully,

Your obedient servants,

C. M. GERE,

ROBERT N. TORREY,

Commission.

Filed in the Department of Internal Affairs of Pennsylvania, June 30, 1886.

J. SIMPSON AFRICA,

Secretary of Internal Affairs.

[NOTE.—The maps mentioned above are too large to be conveniently printed with this report, but will appear in a separate volume, which will include the reports and maps relating to the Ohio and West Virginia boundaries.—J. S. A., *Sec. Int. Affs.*]

PENNSYLVANIA AND WEST VIRGINIA BOUNDARY SURVEY.

Honorable J. Simpson Africa,

Secretary of Internal Affairs,

Harrisburg, Pa.

I have the honor to transmit herewith the final report of the joint commission, appointed by the States of Pennsylvania and West Virginia, "to examine as to the true location of the monuments which mark the boundary line between the two States, and to replace any monuments which have become dilapidated or been removed from the boundary line between said States," accompanied by the report of C. H. Sinclair, of the U. S. C. & G. Survey, who ran the line, with maps and drafts necessary for a clear understanding of the same.

Respectfully, your obedient servant,

F. L. Hoge,

Secretary of Joint Commission.

Filed in the Department of Internal Affairs of Pennsylvania, July 10, 1886.

J. Simpson Africa,

Secretary of Internal Affairs.

The joint commission appointed by the States of Pennsylvania and West Virginia, to re-locate the boundary line between those States, take pleasure in reporting the completion of the work for which it was selected.

By reference to our report made in 1883, it will be seen that the meridian boundary, (about 64 miles in length,) and the parallel boundary for a distance of 21 miles from the s. w. corner of Pennsylvania, have been surveyed and permanently marked; also, a further distance of $14\frac{8}{10}$ miles of the latter boundary surveyed, when the exhaustion of the appropriation caused a suspension of the work. It was not until the legislatures of 1885 had made the appropriations, estimated by the commissioners as necessary to complete the survey and marking of the east and west line, that work could be resumed. The Secretary of the U. S. Treasury having, at our request, kindly detailed Mr. C. H. Sinclair, of the U. S. Coast and Geodetic Survey, that gentleman, in September, 1885, resumed the field work where it had been suspended in 1883, and completed the survey to the Maryland line about the middle of October. Mr. Sinclair was enabled, by the possession of Mason and Dixon's notes of the survey of 1767, to clearly identify the position of the old mounds and thus

accurately retrace the old line. For reasons which a reading of Mr. Sinclair's report makes obvious, the commissioners in charge of running the line determined to attempt no rectification of this position of the line, but to permanently mark it as retraced by Mr. Sinclair. Capt. Chipley, who had charge of the work of setting the monuments, came out as soon as the survey was completed, contracted for the stone, and superintended the planting of them. This work was completed by the middle of November. The first 21 miles had already been marked under the supervision of Mr. McCullough.

On receiving notice of the readiness of Mr. Sinclair to report, a meeting of the joint commission was called, and held in Pittsburgh, Pa., on the 28th day of January, 1886. At this meeting were present Messrs. Gist, Chipley, and Hoge, on the part of West Virginia, and Messrs. McCullough and Walker, on the part of Pennsylvania, our honored chairman, Col. James Worrall, of the latter State, having been removed by death.

Owing to indisposition, Mr. McCullough, who had been elected to the vacant chair, requested Mr. Gist to preside.

Mr. Sinclair, who was present, presented his report, with two admirably executed charts, embracing everything necessary to a clear understanding of the survey.

Before resuming field work in 1885, Mr. Sinclair had endeavored to obtain information in regard to the monument which marks, in the Pennsylvania line, the termination of a meridian run by Lieut. Michler, of the U. S. engineers, for the Maryland and Virginia joint commission, in 1859. No report of that commission, or copy of it, was on file in the records of West Virginia, and the line above referred to appears never to have been accepted by either West Virginia or Virginia as the western boundary of Maryland.

Acting on the same principle which controlled it in the establishment of the north and south boundary between Pennsylvania and West Virginia, this commission determined to terminate its work at what has been known for years as the intersection of the Virginia and Maryland boundary, and the southern line of Pennsylvania. On motion of Mr. Gist, it was resolved that a suitable monument should be erected at the point above-mentioned, and that the commissioners and Mr. Sinclair should be present to superintend its location.

On motion of Mr. Hoge, the chair appointed Messrs. Walker, of Pennsylvania, and Chipley, of West Virginia, to audit the accounts of Messrs. McCullough and Hoge, of expenditures in the prosecution of the work of the commission, and to determine the basis of settlement between the two States.

This committee, after a due examination, reported that, after the payment by Mr. McCullough of $103 due Mr. Sinclair, there would be due the State of Pennsylvania from West Virginia $12 49; the expenditures of Pennsylvania, after the payment of Mr. Sinclair's bill, amounting, at the

time of this meeting, to $4,817 66, and those of West Virginia to $4,805 17.

Prior to adjournment to meet at the Maryland corner, the commission adopted resolutions expressing its deep regret at the removal, by death, of its honored chairman, Col. James Worrall, of Pennsylvania. His long experience in public life, his acknowledged integrity, ability, and energy, and the great interest taken by him, despite of failing health, in the business of this commission, secured for him its confidence and respect, and deserve this expression of our high appreciation of his many excellent qualities.

Mr. Sinclair having indicated the first of April as the time when he could be present at the erection of the monument in the Maryland line, a meeting of the commission was appointed for that time. At this meeting, owing to the detention of Messrs. Walker and Chipley by floods, and of Mr. McCullough by illness, only Messrs. Gist and Hoge were at the appointed place to meet Mr. Sinclair. As the monument was found to have been delivered at the proper point, and the necessary force present to place it in position, Messrs. Gist and Hoge determined to proceed with the work and not to await the arrival of the other commissioners. The spot for locating the monument was first ascertained by measurement from the meridian monument erected by Lt. Michler, of the U. S. Engineers, (whose notes Mr. Sinclair had obtained,) and from the testimony of adjacent landowners, old residents, and surveyors.

A full description of the monument is given in Mr. Sinclair's report. On the north face is inscribed the date of survey, 1885, and the initials "PA." The south, east, and west faces are divided into equal parts by a vertical line, intended to show the intersection of the State lines. On the north half of the east face is inscribed the initials "PA.;" on the south half, the initials "MD." On the east half of the south face, the initials "MD.;" on the west half, the initials "W. V." The south half of the west face bears the initials "W. V." and the north half the initials "PA."

During the preparation of this report, the Commission has received intelligence of the death of another of its members, that of Mr. James McCullough, of Pennsylvania. Though well advanced in years, Mr. McCullough, as a member of the executive committee, has, from the beginning of the survey, in May, 1883, to the end of November, 1885, shown a zeal and energy commendable in a much younger man; in fact, it may be said that the last years of his life were devoted to this service.

We cannot close this report without the expression of our sense of obligation to Mr. Sinclair for the able and thorough manner with which he has conducted the survey. The commission congratulates itself on having secured the services of a gentleman so accomplished in his profession, and views the severance of its very pleasant relations with him with sincere regret.

The joint expenses of the two States in the prosecution of the work for

which the commission was created amount to ($9,689 75) nine thousand six hundred and eighty-nine $\frac{75}{100}$ dollars. Mr. Sinclair's report, with charts, accompany and are made part of this report.

Respectfully submitted.

J. C. GIST,
JOHN J. CHIPLEY,
F. L. HOGE,
Commissioners on the part of West Virginia.
W. W. WALKER,
Commissioner for Pennsylvania.

NOTE.—The maps and report of Mr. Sinclair had received Mr. McCullough's approval prior to the writing of this report.

F. L. HOGE,
Secretary Joint Commission.

Report on the Survey of the the Parallel Boundary between Pennsylvania and West Virginia, 1885.

C. H. SINCLAIR, *U. S. Coast and Geodetic Survey.*

Filed in the Department of Internal Affairs of Pennsylvania July 10, 1886.

J. SIMPSON AFRICA,
Secretary of Internal Affairs.

CHARLOTTESVILLE, VIRGINIA, *January 15, 1886.*

Honorable JAMES MCCULLOUGH, *Chairman of the Penn. and West Va. Boundary Commission, Canonsburg, Pennsylvania:*

DEAR SIR: I take great pleasure in submitting to the commissioners my final report on the completion of the survey of the parallel boundary between the States of Pennsylvania and West Virginia.

Upon application of the commissioners to the Secretary of the Treasury, I was detached from duty in Kansas and directed to take charge of this work. I started to Washington on September 4th, to secure the instruments necessary for conducting the survey. Every facility was given me at the Coast and Geodetic Survey office, so that in a week after reaching Washington I was able to leave for the field. As soon as possible, the commissioners were notified of the date on which I would be at Point Marion, the nearest point for beginning the work where accommodations could be found for the party.

I reached Point Marion on the 15th of September, with the instruments and outfit, and was ready for starting the field work, but owing to the short notice given the commissioners, the party did not assemble till the 23d.

In the meantime, I determined the azimuth for ranging out the line, by twenty-four observations on Polaris and error of the chronometer by

means of five time stars, at a point 242 feet east and four feet south of the terminal mound of the third tangent of 1883, and with the kind assistance of Mr. Joseph Burchinal, looked for old mounds to the eastward on the mountain, and opened a line through the heavy woods on the summit and west side of the Laurel Hills, besides locating a forward point on the summit, 4.5 miles distant from the beginning of the tangent.

The work was conducted precisely as in 1883, so that it is unnecessary here to describe it in detail. Practically the same instruments were used also.

You will recollect that the entire distance between the s. w. corner of Pennsylvania and the Maryland corner was divided into four sections, and that three of these were surveyed in 1883. Only the fourth or last section was run in 1885.

The Superintendent was not able to assign me an assistant, in consequence of which it was necessary for me to both range out the tangent or guide line, and afterwards measure its length and locate all the old boundary marks.

On the 24th of September, the day after the party arrived, points were interpolated between the azimuth station and the summit of the Laurel Hills, and next day the large transit was moved to the forward point, 4 5 miles distant, from which another point was located on the heavily-wooded ridge owned by J. W. Kelley, a little more than two miles further east. When the transit was set up at this new station, it was found necessary to move it about one thousand feet to the eastward, on the second summit of the same ridge, in order to overlook a long timbered slope and see a high ridge somewhat more than a mile away.

From this second station on Kelley's ridge, a sight of more than nine miles was obtained to the ridge just beyond the Five Forks, owned by Adam Sliger, and points were interpolated on all of the prominent intervening hills. Two more short sights from Sliger's ridge, of about 1.5 miles each, carried us practically to the Maryland corner, which point was reached on the 8th of October, and the measurement of the line was begun in the afternoon of the same day.

As in 1883, small triangulation was employed for getting the distances, on account of the broken character of the country.

By the 19th of October, despite frequent rains, the measurement of the fourth tangent was completed. Between the showers next day, a point was located on the high bluff near the east bank of the Cheat river, and on the 21st, all of the third tangent and a portion of the second, as far as Mt. Morris, was reviewed a distance of 11.5 miles, to locate several new stubs and see that the pegs of 1883 were still in place. This completed the work of the organized party, which was ready to be discharged then.

By the 26th of October, I had computed the position of the intermediate points on the fourth tangent, set the pegs, and left for Harrisburg to ob-

tain additional data for constructing the charts. I found it also necessary to visit Philadelphia to consult Mason and Dixon's field notes, and secure material for the maps.

On the fourth or last tangent, there were eighteen old mounds or line-marks used in retracing the boundary. Most of them were well-defined mounds or stone heaps; one was a line tree, another a line fence. On the last section, the fences were very generally on the line. The large stone that marks the north end of the meridian, through the Fairfax stone, was also used as a line-mark.

After leaving the initial mound on the fourth tangent, the first line-mark is a white oak tree, on the east side of the Morgantown and Fairchance pike, between the lands of Messrs. Williams on the north and Pugh on the south. The new monument was placed on the west of this tree at 1.95 miles distant, and four feet north of the tangent. An old stone heap was supposed to have been on the mountain side about half mile east of this point, but no one knew its position.

The next mark is a well defined stone pile in the midst of thick timber, about one mile west of the summit of the Laurel Hills. Both sides of the line are owned by the Fairchance Furnace Co. A long cut was made about twenty feet south, extending east and west. The new monument was set in the centre of the stone pile at 3.6 miles and 29.6 feet north of the tangent.

The next old mark is a stone pile about 700 ft. east of the summit of the Laurel Hills, in a very inaccessible place on the steep mountain side. Both sides owned by the Fairchance Furnace Co. It is 4.6 miles and 35 feet north of the tangent. Instead of marking this mound with a stone monument, a new position was selected on the top of the mountain, commanding an extensive view east and west, at a distance of 4.45 miles and 34.3 feet north of the tangent.

The next mark is the line fence on the north side of Mr. Grimm's land. This fence is ten feet north of the line between the next mounds east and west of it, but its position was well-defined and the boundary through here is not more irregular than that portion near the west foot of the Laurel Hills. There was no authority for making any change. The new monument was placed 5.5 miles distant and 58 feet north of the tangent.

The next mark is a well defined stone pile on the easterly of the two ridges of Kelley's mountain. It is about 800 feet east of this second summit and cliff of large rock. Messrs. Barnes and Caruthers own the north and J. W. Kelley the south side. The new monument was placed in the centre of the pile at a distance of 6.55 miles and 61.7 feet north of tangent.

The next mark is a well defined earth mound on a high hill with heavy woods on the north, owned by Jackson Myers, and a cleared field south, owned by Jesse Smith. It is about 400 feet east of the Haydentown road. The new monument was placed in the centre 7.65 miles distant, and 68.5 feet north of the tangent.

The next mark is the remains of a stone heap on a high cleared hill under the line fence between the land of Jonas Maust on the south, and Mrs. Haines, on the north side. It is about ¾ mile west of Big Sandy creek. Atone time the land on both sides was owned by one man, and he removed most of the stones from the midst of the field. The place was pointed out by one of the land owners who has known the location for fifty years, and remembers well the old stone heap. The new monument was set in the centre at a distance of 9.15 miles and 89.7 ft. north of the tangent.

The next mark is a very large earth mound on the south side of the public road, running along the line here. The north side is owned by Joseph Prinkey, south side by John Harader. An old grave-yard, inclosed by a stone wall, projects into the road on the north side within fifty feet of the mound. The new monument was placed in the centre at a distance of 10.8 miles and 123.5 feet north of the tangent. About half a mile west of this was a mound recently destroyed while the road was being worked.

The next mark is a well defined earth mound about half a mile east of the old grave-yard above mentioned. It is on the west side of a small run, about 800 feet west of Little Sandy creek, in a deep wooded hollow. The north side is owned by Samuel Maust, south side by Lawrence Neiner. As this is so close to the preceding, no stone monument was placed here. Distance from the initial 11.35 miles and 133.1 feet north of the tangent.

The next mark is an earth mound, very indistinct, but with its position well preserved by the junction of three estates—John Sees and Price McClellan on the north and Henry Carter on the south side. The new monument was placed in the centre, 11.85 miles distant and 146.25 feet north of the tangent.

The next mark is a well defined stone heap on a high cleared hill between the land of Ezra Thomas on the north and Samuel Thomas on the south side. It is at the east end and a little north of a short stone fence. The new monument was set in the centre at a distance of 13.15 miles and 180 feet north of the tangent.

The next mark is an irregular stone pile in a large body of woods, though near the mound the woods are small and sparse, down in an extensive flat, not near any fence or good reference mark. The north side is owned by Marshall Wright, south side by Harrison H. Glover. Distance 14.35 miles and 195.48 feet north of the tangent. A new monument was set in the centre.

The next mark is a very large earth mound on the south side of the line road, on top of Sliger's ridge, about 1100 feet east of the Five Forks. Woods on the north side owned by Christopher Dennis, cleared on the south side owned by Adam Sliger. The new monument was placed in the centre at a distance of 15.8 miles and 228.65 ft. north of the tangent.

The next mark is a well defined irregular stone heap under the line fence, with woods on the north owned by Perry Rynd, and cleared field south owned by Alpheus Cuppet. It is on the north slope of the hill. A new

monument was set in the centre. Distance 17.35 miles and 269.84 feet north of the tangent.

The next mark is a large well defined stone pile on a high hill in the woods about 1300 feet west of the Brandonville and Somerfield pike. The north side is owned by James Fearer, south side by John Glass. The new monument was placed in the centre. Distance 18.4 miles and 298.9 feet north of the tangent.

The next mark is the large sandstone that marks the north end of the meridian through the Fairfax stone, on the east side of the Brandonville and Somerfield pike. This stone was set in 1859 by the party of Lieutenant Michler. It is about 15 inches square at the base, tapering smaller towards the top, and terminates in a pyramid. It is six feet long, three and a half feet out of ground. The north side is owned by John Glass, south side by Sebastian Dean. Distance from the initial is 18.65 miles and 310.51 feet north of the tangent.

The last mound marks the junction with Maryland. It is $\frac{3}{4}$ mile east of the stone above described. The new monument was placed in the centre, and is 19.45 miles distant and 333 53 feet north of the tangent. Abraham Thomas owns the land on the south side. This monument is 16 inches square—dressed $3\frac{1}{2}$ feet and rough cut $3\frac{1}{2}$ feet. The underground cube is $16 \times 16 \times 16$ inches.

As was indicated by the last three mounds on the third tangent in 1883, the line tends to come back towards the theoretic curve through the s. w. corner of Pennsylvania. The stone pile one mile east of the summit of the Laurel Hills is 3.6 miles distant and 25.6 feet north of the tangent through the first mound. It should have been theoretically 7.1 feet north, showing thus a bend to the north of 18.5 feet, a very rapid gain.

The eighth mound, at a distance of 10.8 miles, has an offset of 119.5 feet; theory makes it 64.7 feet: the bend north is therefore 54.8 feet.

At the stone marking the north end of the meridian through the Fairfax stone, the offset is 306.5 feet; it should have been by theory 193.0 feet, showing a bend to the north of 113.5 feet.

At the junction with Maryland, 19.45 miles distant, the offset is 329.5 feet north of the tangent through the first mound; it should have been theoretically 208.5 feet, showing an accumulation of bend to the north of 121.0 feet. (See table at the end.)

The initial mound of the fourth tangent is 172.1 feet south of the theoretic curve through the s. w. corner of Penn.; and the bend north at the end of the line amounts to 121.0 ft., so that the line at its termination is only 51.1 feet south of the theoretic curve.

Taking the line, section by section, it will be seen that the apparently regular part is very irregular, that is, when referred to the astronomical parallel, and that the irregular portions are about as well laid down as the other.

The first section, between the s. w. corner, latitude 39° 43′ 18″.19,

and Lantz's Hill, latitude 39° 43′ 18″.97. By reference to the theoretic curve through the s. w. corner, the old post hole on Lantz's Hill falls 11.75 feet south; astronomically it is 78.93 feet north, or the line in 11.5 miles is in error 90.68 feet.

If the astronomical parallel should be insisted upon, the line would have to be made very irregular instead of the almost theoretic curve now existing.

The next section, Lantz's Hill, latitude 39° 43′ 18″.97 and Bald Hill, latitude 39° 43′ 18″.44 (the latitude station is 1½ miles west, but the latitude here is assumed to be the same). The old mound on Bald Hill is about 54 feet south of the point on Lantz's Hill astronomically. It is 69.7 south of the theoretic curve through Lantz's Hill, or in 14 miles the line is in error only about 15.7 feet. This theoretically irregular portion is thus seen to be astronomically quite regular.

The next section, Bald Hill, latitude 39° 43′ 18″.44, and Harvey's, latitude 39° 43′ 18″.14. Astronomically Harvey's is a little over 30 feet south of Bald Hill; referred to the theoretic curve through Bald Hill, it is over 85 feet south; the error in ten miles is about fifty-five feet.

The last section, Harvey's, latitude 39° 43′ 18″.14, and the north terminus of the Fairfax stone meridian, 1859, latitude 39° 43′ 17″.92. (Latitude was observed at this stone and I use this instead of the end of the line ¾ mile east.)

The latter is 22.26 feet south of the former astronomically; by reference to the theoretic curve through Harvey's, it is 113.5 feet north of Harvey's, or an error of 135.8 feet in 18.65 miles.

On a uniform spheroid, one with no inequalities in elevation, and no variation in density, it would be a very simple matter to lay down a parallel of latitude, but when we have to deal with a very uneven surface and deviation of the plumb line or displacement of the zenith, the laying down of such a line becomes both difficult and expensive; consequently, astronomers adopt practical, rather than purely theoretical methods in dealing with boundaries of this nature. All are approximations.

A wholesale correction of this boundary would have caused endless litigation and a large outlay of money, without any practical return to the States. Where the old marks were so numerous as on the last thirty-four miles, there was no occasion for making any change in existing points, and on the first part of the line, where the marks were rather scarce, no material change was made in the traditional boundary.

Quite a number of the old mounds on that portion run by Mason and Dixon have been identified by the close agreement of the two measurements. It is thus very easy to prove that the stopping place of Mason and Dixon is not the "second crossing of Dunkard," but Brown's Hill, a short distance west of the third crossing of Dunkard. Besides the agreement of distances between the last seven or eight mounds on the west end of Mason and Dixon's work, an extract from their field notes found in the State Department, Washington, D. C., gives positive evidence of the west terminus being a mound on a high hill.

"The sector stood on ye top of a very lofty ridge, but when ye offset was made of 3 ch. 38 lks., it fell a little eastward of the top of ye hill; we therefore extended ye true parallel 3 chs. 80 links westward, which fell on ye top of said ridge; there viz: at 233 miles, 17 chains 48 links from the post marked west in Mr. Bryans field, we set up a post marked W. on ye west side, and heaped round it earth and stone three yards and a half diameter at ye bottom and five feet high. The figure nearly conical." This post is 230 miles 18 chains 21 links from the beginning of the west line.

The mound on Brown's Hill was the most westerly one found during the survey of the boundary.

There were several places where the mounds (or traditions of mounds) were too close together for mile marks, and I was not able to account for them until Mason's and Dixon's notes were consulted. From these I learned that mounds had been placed not only at every mile, but also on the summit of the prominent ridges. It is very evident that many of the mile mounds fell in hollows or on the hillsides, and were destroyed in the course of time, and that most of those now in existence are the ridge mounds, and the distances between these of course vary as the hills themselves. These ridge mounds are the principal ones marked with new stone monuments.

No attempt was made to restore the mile marks, as the adjacent ridges are intervisible and generally not very far apart.

There are two charts of the line, both on a scale of $\frac{1}{40000}$. The first was designed to show the method of tracing the boundary by means of tangents, all the old line marks, the new monuments and the variations of the boundary from a theoretic curve on a uniform spheroid. This theoretic curve is drawn through the s. w. corner of Pennsylvania for convenience; it might just as well have been assumed through any other point, or even made the mean theoretic parallel.

The second chart shows the State line in plan and is the complete map of the boundary, giving the stones by number, and the distances in miles and feet, counting from the s. w. corner. These two maps are essential for showing all the details of the survey, and are complete in themselves without reference to the chart of 1883, which is included in the first, with some changes.

Yours respectfully,

C. H. SINCLAIR,
Coast and Geodetic Survey.

JAMES MCCULLOUGH,
W. W. WALKER,
Commissioners of Pennsylvania.

THE GEODETIC TRIANGULATION IN PENNSYLVANIA.*

By MANSFIELD MERRIMAN, *Acting Assistant U. S. Coast and Geodetic Survey.*

It is the object of this article to give an account of the triangulation executed in Pennsylvania during the past eleven years by the United States Coast and Geodetic Survey. The subject will be divided into four parts: First, a statement concerning the nature of the triangulation and the use that can be made of it; second, a brief account of the methods employed; third, a record of the yearly progress of the work, and fourth, a statement of the principal geographical positions thus far determined.

1. The Nature of a Geodetic Triangulation.

The operation of triangulating consists in determining, by means of triangles, the positions of points on the surface of the earth, so that they may be laid down on paper in their proper relative locations and serve as a basis for the construction of an accurate map. If the area embraced in the work be large, the form and size of the earth must be taken into account by means of the science of geodesy, and hence the triangulation is called geodetic.

When a land surveyor determines the area of a field by the old method of compass and chain, he measures the length and the magnetic bearing of each of its sides. From these measurements the coördinates of each corner of the field with respect to an assumed origin and axes are easily computed. One of these coördinates is the distance of the point east or west from the assumed meridian; another is the distance of the point north or south of the corner taken as the origin. These two coördinates—sometimes called longitude and latitude—locate the position of the point and enable it to be plotted in its proper place relative to the others. In geodetic work points are located in a similar manner by means of their latitudes and longitudes. The word latitude, however, is used in its geographical sense as meaning the distance from the equator expressed in degrees, minutes, and seconds of arc, and the word longitude denotes the distance, similarly expressed, from an assumed meridian. The meridian used by the Coast and Geodetic Survey is that of Greenwich. Of course all points in this country are in north latitude and in west longitude.

The question of constructing an accurate map of a given area may be said to reduce to the determination of the latitudes and longitudes of a sufficient number of points. For instance, if the latitude and longitude of each street corner in a town were known with precision, it would be easy to make a map showing the streets by simply plotting each corner by means of those coördinates, and then drawing the proper lines to connect the

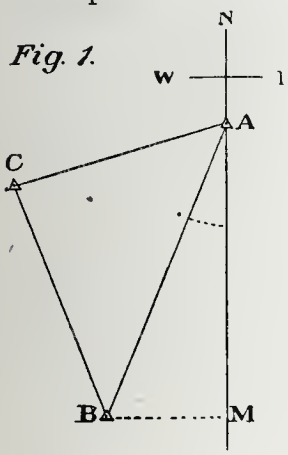
* Contributed by authority of the Superintendent of the U. S. Coast and Geodetic Survey.

points. As, however, there is no cheap and accurate method of determining the latitudes and longitudes in such a case, other methods must be used for locating the points so that they fall upon the map in their proper relative positions.

It is one of the objects of the triangulation of Pennsylvania to determine the latitude and longitude of each of its stations. A triangulation, in fact, may be defined as a cheap method of determining the latitudes and longitudes of points. Incidental to this, and yet important for the prosecution of surveys, is the determination of the lengths of the sides of the triangles and of the angles which those sides make with the true meridian.

If the latitude and longitude of a point be determined by means of astronomical observations and computations, its position upon the earth's spheroid is known. Now, if the latitude and longitude of another point in that neighborhood be required, the cheapest method is not to take a second set of astronomical observations, but to determine the distance between the two points and the angle which the line makes with the meridian, and then to compute the difference of latitude and longitude. For example, in Fig. 1 let A be a point whose geographical position has been astronomically determined, and let B be a second point to the south-westward, whose position is required. Let A M be a meridian drawn through A. Now, if the distance A B and the angle B A M be measured, the distances A M and B M may be computed by plane trigonometry if the line A B is short, or by the rules of geodesy if the length of A B is sufficient to require the curvature of the earth to be considered. These distances A M and B M are then converted into seconds of arc, and the latitude of B is equal to that of A minus the number of seconds in A M, while the longitude of B is equal to that of A plus the number of seconds in B M.

Fig. 1.



If the line A B be long, it will seldom be possible to find its length by direct chaining, but one or more triangles will be necessary. The simplest case is that when a third point C can be found, which is intervisible with A and B, and so located that the distance A C can be directly measured by a chain, or by rods, or by a special base apparatus, as the precision of the work may demand. Then by measuring also the two angles B A C and B C A, we have the complete data for computing, by the rules of trigonometry, the required distance A B. More usually, however, the base line to be directly measured is situated at some distance from the point A, as shown at G H in Fig. 2.

Here the side H F is computed from the measured base G H and the angles F H G and H G F. Then from the known length of H F, and the angles of the triangle H D F, the side D F is found, and thus the computation is carried on until the required distance A B is found. By ex-

tending the computations a step further it is now evident that the latitude and longitude of each of the stations C, D, F, G, and H may be also found; for, since the angle C A M is known, C may be located in the same manner as B, and from C the point F is located, and so on in order.

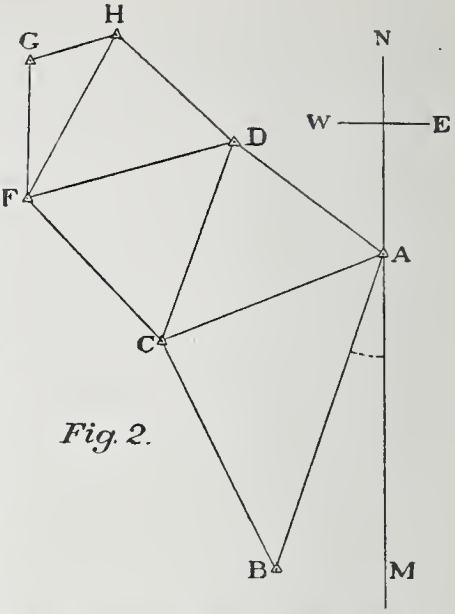


Fig. 2.

It will be seen, from the above explanation, that a geodetic triangulation includes five distinct kinds of field operations.; first, the astronomical determination of the latitude of a station; second, the astronomical determination of the longitude of a station; third, the astronomical determination of the azimuth (or angle made with the true meridian) of one of the sides; fourth, the measurement of a base, and fifth, the measurement of horizontal angles. Practically, however, the greater part of the field work of a triangulation consists in the observation of angles, since it is found that the latitudes and longitudes of points two or three hundred miles distant from an astronomical station can be computed through the triangles with the necessary precision and with a less expense than by other methods.

Suppose now that a triangulation, like the one shown in Fig. 2, has been completed. What use can be made of it? The two coördinates—latitude and longitude—are known for each of the stations. At each station the azimuths (or true bearings) of all the lines radiating from that station are known. The lengths of all the sides of the triangles are known. How can these be used to construct an accurate map of the country?

In the first place, it may be observed that the triangulation furnishes the exact geographical positions of a number of points, so that these may be plotted in their proper places with respect to a system of parallels of latitude and meridians of longitude. Starting at one of the stations—for instance at C—a surveyor may at once determine the true meridian, since the true bearings of each of the lines C A, C D, etc., are known. Then he may make a local survey of the country around C, locating the roads, streams, houses, State lines, county lines, etc., with reference to that true meridian. Next, going to the station F, a similar survey may be made for that vicinity. These topographical surveys may now be plotted on the map, and each will be in its proper position with reference to the other. If the survey made from F be extended to meet that made from C, there is afforded a check upon the accuracy of the local surveys. Hence the inaccuracies of the topographical work cannot spread and increase, for a constant system of independent checks is obtained wherever a connection can be made with the triangulation. The triangulation forms a net-work, or rather a frame-work, upon which everything else in the map is hung. This large frame-work is

constructed with care and accuracy, and all surveys connected with it are properly connected with each other through it.

In the second place, it is maintained that the cost of an extended topographical survey is a minimum when based upon a geodetic triangulation. Each side of the triangulation furnishes a base line, whose length and azimuth are known. The great value of an accurately determined base line for the prosecution of topographical work will be evident to every surveyor. From it other points may be located and other lines of reference obtained. The true bearing, or azimuth, of every line of the survey is at once determined without the expense of astronomical observations. By the help of the three-point problem, stations for the use of plane table or stadia (telemeter) parties may be quickly located. The constant system of checks renders the accumulation of large errors impossible, and hence less revision of the field work is required. Thus the effect of a triangulation is to lessen the cost of topographical surveys and maps.

Another use of the triangulation that will be ultimately made is that of furnishing reference points for the precise description of the boundary lines of land properties. No system for this purpose has yet been adopted in Pennsylvania, and as a consequence the majority of land records are so defective that the retracing of old lines from the recorded descriptions is often impossible, and almost always attended with trouble and expense. Ultimately, when the secondary and tertiary triangulations become extended, so that one or more stations are located in every township, the monuments which mark these stations will enable a system to be formulated whereby the boundaries of every farm may be accurately described. Or, in other words, from these monuments the latitude and longitude of each corner of the farm may be computed and recorded; to recover a lost corner it will then only be necessary to run the proper lines from the nearest monument, or nearest known corner, so as to determine the point whose geographical position is given.

2. The Methods of Geodetic Triangulation.

Two classes of triangulation are usually recognized in geodetic work ; the primary series, which connects directly with the bases and which employs the longest possible lines ; and the secondary series, which determines points within the larger triangles. To this is often added a tertiary series, which locates stations for the special use of plane table and stadia (telemeter) parties. On the U. S. Coast and Geodetic Survey it is required that in the primary series the probable error of a determined angle should not exceed $0''.3$, and that the limit of error in closing a triangle should not exceed $3''$, while for the secondary series the corresponding values are $0''.7$ and $6''$ respectively.

The first field operation is that of reconnaissance, which decides upon the locality of each of the stations. These are to be so selected as to secure the best system of triangles, quadrilaterals, or hexagons, to cover the given area so as to satisfy the prescribed conditions of accuracy and minimum

cost, both in the execution of the triangulation and in the subsequent use that is to be made of it. For the stations of the primary series usually the highest elevations are selected, and accordingly the longest possible lines obtained consistent with the formation of well proportioned figures. The intervisibility of adjacent stations must of course be insured, and if possible approximate values of the principal angles be determined. For a full account of the conditions required to be observed in reconnaissance work, see Report of the Coast and Geodetic Survey for 1882, pp. 151–155.

The measurement of a base line is an operation which requires the most precise apparatus and careful field work in order that its length may be accurately determined. As a primary base line is only 5 or 10 miles in length, while the sides of the primary triangles usually exceed 20, and are sometimes more than 50 miles long, it is evident that any error in the measurement of the base will be multiplied in the longer lines, and accordingly the greatest precision in the linear measurement is demanded. The probable error, or uncertainty, in the length of the measured bases on the *eastern* coast of the United States is about $\frac{1}{250000}$th part of the length, although the lower value of about $\frac{1}{500000}$ was attained in the cases of the Massachusetts and the Epping base. The former of these fractions is equivalent to an uncertainty of a quarter of an inch in a statute mile, and the latter to one eighth of an inch per mile. Concerning base line measurements, the following articles in the Reports of the Coast and Geodetic Survey are among others referred to: Report of 1854, pp. 103–108; Report of 1864, pp. 120–144; Report of 1873, pp. 123–136; Report of 1880, pp. 341–344; Report of 1882, pp. 107–149; Report of 1883, pp. 273–288.

The determination of the astronomical latitude of a station is generally effected by measuring with a zenith telescope the differences of the zenith distances of several pairs of stars. The longitude of a station is found by comparing by means of the electric telegraph the local time of the meridian of the station with that of some astronomical observatory whose longitude is known. The azimuth of one of the lines of the triangulation, or the angle which it makes with the true meridian at one of the stations, is determined by observations on circumpolar stars. For a full account of the methods of determining latitude, longitude, and azimuth, reference is made to the papers in the Report of the Coast and Geodetic Survey for 1880, pp. 201–286.

The field work of the triangulation in Pennsylvania has thus far consisted only of reconnaissance, and of the measurement of horizontal angles, the latitudes, longitudes, azimuths, and distances being determined by computations from the connection with the main triangulation of the coast, which, in its turn, is connected with the base lines and astronomical stations. The nearest bases are the Fire Island base, on the southern coast of Long Island, and the Kent Island base, on the eastern shore of Chesapeake bay opposite Annapolis. The nearest station where azimuth has been observed is Principio, in the north-eastern part of Maryland, and the nearest latitude and longitude stations are also in that State.

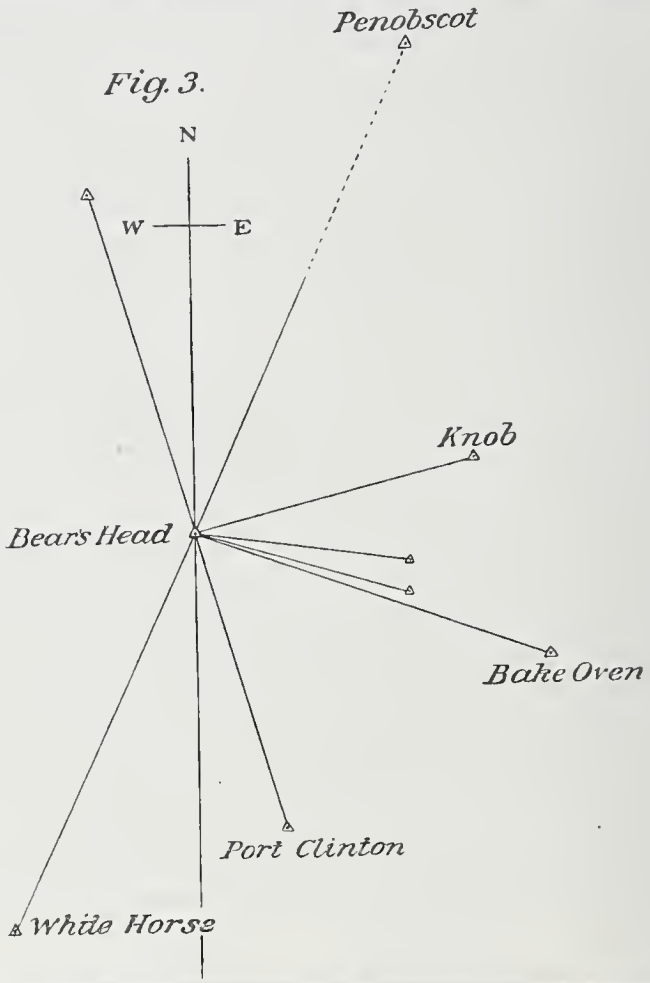
The measurement of horizontal angles hence constitutes the principal part of the field work of a triangulation. This, although theoretically of a simple nature, is in practice attended with some difficulty on account of the distance of the signals and the necessity of securing a high degree of precision in the observations. The wooded character of the summits upon which the stations are located in this State has rendered it usually necessary to erect towers varying in height from 15 to 60 feet. A single tripod is first constructed to support the theodolite, and around this an independent scaffold is built, so that the motions of the observer may not be communicated to the instrument. For signals to be observed upon at the surrounding stations, targets and heliotropes have been employed, the former being used for lines less than about 20 miles in length, and the latter for longer lines. The heliotrope is an instrument by means of which the rays of the sun are reflected from a small mirror so as to strike the observer's station, and which are seen by him in the form of a small bright star or spot of light; for long lines the heliotrope signal is almost indispensable, since targets can only be seen under the most favorable atmospheric conditions.

The instrument used for the measurement of the horizontal angles in this State is a Gambey repeating theodolite with a limb ten inches in diameter, and reading by two verniers to three seconds. The angles have been read in sets of four or six repetitions each, the average total number of single measures for each independent angle being usually from 90 to 120. In each set one half of the measures are made with the telescope in the direct position, and the other half with it in the reverse position, in order to eliminate any error in the level of its horizontal axis. Both verniers are read in order to eliminate any error of eccentricity in the graduated plate. Usually, also, the sets are taken alternately from left to right and from right to left, in order to balance any errors arising from the use of the clamps or from a motion of the tripod. The different sets are taken upon different parts of the circle to eliminate any errors in the graduation of the limb. Lastly, the observations are continued over several days in order that the signals may be seen under different atmospheric conditions. The following is an example of four sets taken at Bake Oven station on August 26, 1885:

Station Observed.	Time.	No. of Reps.	Reading.			Angle.
			A	B	Mean.	
Smith's Gap, ...	3:45	4	0° 00′	00″	12″ 06″.0	98° 36′ 58″.1
Knob, ...	4:02		34 27	54	63 58 .5	
Smith's Gap, ...	4:06	4	0 00	12	21 16 .5	98 36 55 .5
Smith's Gap, ...	4:33	4	50 29	33	48 40 .5	98 36 62 .6
Knob, ...	4:37		84 57	45	57 51 .0	
Smith's Gap, ...	4:40	4	50 29	42	57 49 .5	98 36 60 .4

The mean of all the values thus determined for the different sets constitutes the observed value of the angle. Usually the observations are extended to include other angles than the simple independent ones, and, in such cases, an adjustment of the observed values is made by the method of least squares. For instance, the station Bear's Head was occupied in July, 1885, and the five primary stations, Penobscot, Knob, Bake Oven, Port Clinton, and White Horse, were observed upon. These five lines include four simple, independent angles, but the angles observed numbered ten, being all the angles resulting from the combination of the lines two by two. The following shows the observed and adjusted values of these ten angles·

Fig. 3.



Angle at Bear's Head.	No. of reps.	Observed value.	Adjusted.
White Horse—Port Clinton,	48	41° 15′ 39.97″	40.33″
White Horse—Bake Oven,	40	94 47 12.71	14.02
White Horse—Knob,	48	129 19 47.57	47.09
White Horse—Penobscot,	40	180 39 48.43	47.24
Port Clinton—Bake Oven,	48	53 31 34.27	33.69
Port Clinton—Knob,	48	88 04 05.75	06.76
Port Clinton—Penobscot,	48	139 24 06.97	06.91
Bake Oven—Knob,	48	34 32 33.16	33.07
Bake Oven—Penobscot,	40	85 52 32.39	33.22
Knob—Penobscot,	48	51 19 59.71	60.15

The total number of measures is seen to be 456, or an average of 114 for each independent single angle. The work at this station began on July 20 and was finished on July 30, but the weather only permitted observations on eight days, and on five of these measurements could not be made until the afternoon.

A full account of the method of marking the stations, constructing the towers and signals, and taking the angle observations, may be consulted in the Report of the Coast and Geodetic Survey for 1882, pp. 151–197. This paper also explains the methods of computing the triangle sides and finding the spherical excesses of the triangles.

On account of the curvature of the earth, the horizontal limb of the theodolite is at each station parallel to a tangent plane to the spheroidal surface, and accordingly the sum of the three measured angles of a triangle should be greater than 180°. The spherical excess of the triangle added to 180° gives the quantity which the sum of three measured angles should equal, and their difference is the error in closing the triangle. Having found these errors, a further adjustment is made in order to obtain the corrected spherical angles of the triangle. The following gives the angles

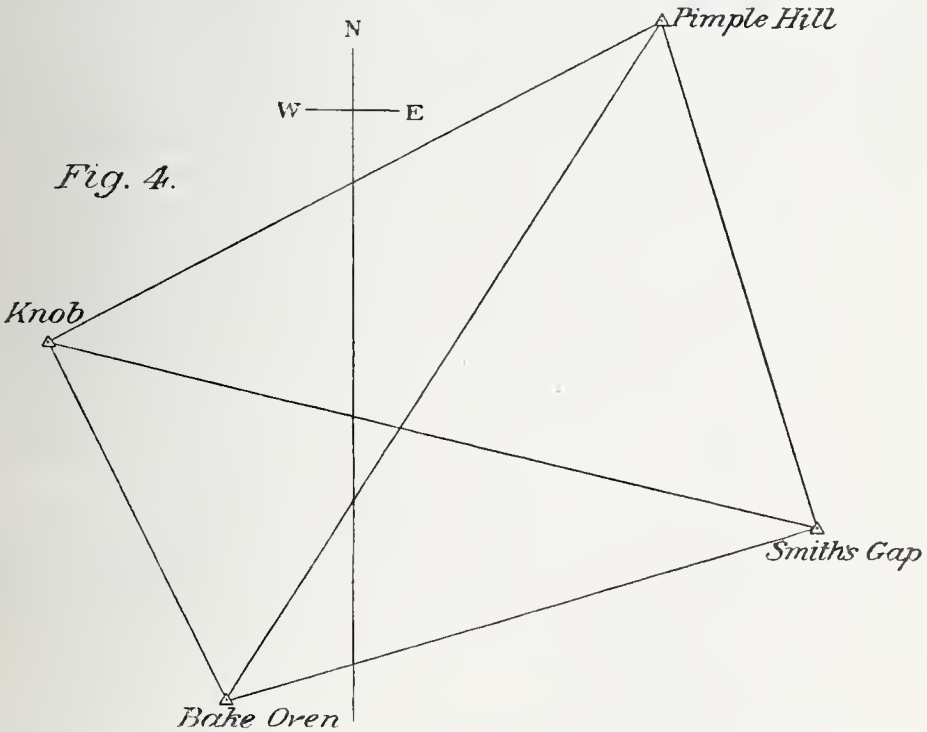


Fig. 4.

and the error of closure in each of the four triangles shown in Fig. 4, all the angles of which were measured during the season of 1885:

Pimple Hill,	49°	04′	50.13″	Pimple Hill,	29°	58′	51.60″
Smith's Gap,	90	21	25.53	Knob,	91	57	51.54
Bake Oven,	40	33	46.91	Bake oven,	58	03	18.14
Sum,	180	00	02.57	Sum,	180	00	01.28
180°+excess,	180	00	01.66	180°+excess,	180	00	01.43
Error,			+0.91	Error,			−0.15

Knob,	50°	37′	17.20″	Knob,	41°	20′	34.34″
Bake Oven,	98	37	05.05	Pimple Hill,	79	03	41.73
Smith's Gap,	30	45	41.35	Smith's Gap,	59	35	44.18
Sum,	180	00	03.60	Sum,	180	00	00.25
180°+excess,	180	00	1.26	180°+excess,	180	00	01.83
Error,			+2.34	Error,			−1.58

After using these errors of closure to adjust the spherical angles, the plane angles of the triangles are found and the triangle sides computed. Lastly, the geodetic latitudes, longitudes, and azimuths are computed by the methods explained in the Report of the Coast and Geodetic Survey for 1884, pp. 323–375.*

3. Progress of the Triangulation in Pennsylvania.

During the past twelve years, Congress has made a yearly appropriation "for furnishing points for State Surveys," by the extension of the triangulation of the U. S. Coast and Geodetic Survey. The annual appropriation during the past few years has been $16,000, which has been applied in a number of States, the average proportion for Pennsylvania being, previous to 1885, less than one tenth of this sum. This amount has only been sufficient to keep a single party in the field for two or three months of the year, and accordingly the progress of the work has been slow. The following brief statement of the yearly progress is derived from the annual reports of the Coast and Geodetic Survey, except that of the season of 1885, which is furnished by authority of the Superintendent.

In the spring of 1875 the Governor of Pennsylvania, at the instance of the State Geologist, Prof. J. P. Lesley, requested the superintendent of the Coast and Geodetic Survey to extend the triangulation of the coast so as to determine points for correcting the State map. Prof. L. M. Haupt, having been appointed Acting Assistant U. S. Coast and Geodetic Survey, and

*The mean error (m) of an adjusted angle is a quantity which has been advantageously used for comparison of the accuracy of various triangulations, and it will be seen that for the best executed work this measure does not exceed 1″.

Of course it does not follow that all work should possess this accuracy; what is required is a proper degree of accuracy depending upon the object for which the triangulation was undertaken and the means and time it was intended to devote to it. This remark is made in order that no unfair criticism may arise in the mind of the reader in looking over the following collection of some resulting mean errors:

U. S. Coast and Geodetic Survey, Yolo-base figure, Cal., by G. Davidson, 1876—1884,	m=±0.51″
Survey of Hanover, by Gauss,	0.59″
Survey of Prussia, by Morozowiez, since 1867,	0.62″
Survey of Denmark, by Andrae,	0.71″
Coast Survey of Prussia, by Bessel & Bayer, in 1838,	0.72″
U. S. C. & G. Survey connection of Lakes Champlain and Ontario by secondary triangulation, by C. O. Boutelle.	0.95″
Survey of Penna. by the U. S. C. & G. Survey, so-called Horse-shoe secondary triangulation, by L. M. Haupt and M. Merriman, 1875 to 1882,	1.75″
Ordnance Survey of Great Britain, 1784 to 1858,	2.21″

instructed to execute the work, took the field on July 1, and spent the summer in reconnaissance. Beginning at the eastern end of the Lehigh Valley, and giving attention to the means for joining with known points of the primary triangulation in New Jersey, the stations Smith's Gap and Bake Oven, on the Blue mountain, were first selected. Other stations to the southward, on the Durham and Reading hills, were later chosen, so that, by the close of the season, an acceptable scheme of triangulation had been laid out, extending from the mouth of the Lehigh to points westward of the Schuylkill. During the same season Assistant G. A. Fairfield identified the station marks at Principio, in Maryland, and at Meeting-house hill, in Delaware, which had been established about the year 1840, and made a reconnaissance north-west into Chester county to begin a series of triangles to connect with those of Prof. Haupt.

In the season of 1876 the reconnaissance was continued and the triangulation work proper begun, six tripods being erected and four stations occupied for the measurement of angles.

During 1877 there were no funds available for the field work, but in 1878 the party of Prof. Haupt was in the field from the first of June to the middle of October. Four tripods were erected and five stations occupied for the measurement of horizontal angles. Two of these stations were Principio and Meeting-house, and thus a connection was effected with the primary triangulation of the coast, so that, at the close of the season, the geographical positions of the stations Londonderry and Rawlinsville were known.

In the season of 1879 four stations were occupied by Prof. Haupt, and at its close the geographical positions of Beartown, Womelsdorf, and Blackspot stations were computed.

During the season of 1880 six stations were occupied, and two new stations selected and observed upon. At the close of this season Prof. Haupt resigned his charge of the work, and Prof. Merriman was appointed Acting Assistant in the U. S. Coast and Geodetic Survey to continue the triangulation.

In the season of 1881 the triangulation was continued by the occupation of two stations.

In the season of 1882 four stations were occupied, and three new stations definitely located and marked. The measurements made this season closed the connection of a horse-shoe chain of triangles between the primary line, Principio-Meeting-house, near the northern boundary of Delaware, and the line Newtown-Mt. Rose, a few miles north of Trenton, N. J. This chain is shown in the page plate. The two lines just mentioned are a part of the primary coast triangulation whose lengths and positions had been previously determined. In order to show the precision of geodetic work, the following results deduced by the Computing Division of the Coast and Geodetic Survey are here stated :

Starting from the fixed line Principio-Meeting-house, the geographical positions were computed throughout the horse-shoe chain, and on arriving

at the line Newtown-Mt. Rose, the following discrepancies were noted: The distance from Newtown to Mt. Rose was found to be 21,153.07 meters, while the same from the coast triangulation was 21,153.10 meters, the discrepancy being 3 centimeters. The azimuth of the direction Newtown to Mt. Rose was found to be 232° 10′ 26.4″, while the same from the coast triangulation was 232° 19′ 10.5″, the discrepancy being 6.9″; the latitude of Newtown was found to be 40° 15′ 03.308″, while the same for the coast triangulation was 40° 15′ 03.411″, the discrepancy being 0.103″; and the longitude of Newtown was found to be 74° 55′ 13.987″, while the same for the coast triangulation was 74° 55′ 13.927″, the discrepancy being 0.060″. The agreement is hence very satisfactory, it being considered that the distance between the two fixed lines used as bases is nearly 150 miles when measured along the center of the horse-shoe chain.

In the season of 1883 the triangulation was continued by the occupation of the stations Governor Dick, Round Top, and Winterstown, the two latter being westward of the Susquehanna river. Towers varying in height from 20 to 40 feet were required at these stations, and also at Dauphin, Pulpit Rock, and Swatara Gap, the other points which were observed upon.

During the season of 1884 the station Swatara Gap was occupied and the horizontal angles measured. Three new stations were selected and marked, and tripods erected over them. A reconnaissance was also begun to connect the stations on the Blue mountain near the seventy-sixth meridian with those in the State of New York. The peak called Penobscot Knob, five miles south of Wilkes-Barre, was definitely selected as the place for one of the stations, and horizontal sketches were taken there and at other points for the purpose of laying out a scheme of triangulation.

For the season of 1885 a larger sum than usual was appropriated for the Pennsylvania work in order to extend the triangulation more rapidly to meet the needs of the Second Geological Survey. Acting Assistant Merriman was instructed to continue the triangulation northward over the anthracite coal regions, Assistant O. H. Tittman to extend the reconnaissance between the seventy-fifth and seventy-seventh meridians northward to the New York State line, and Acting Assistant Barnard to continue the work westward of the Susquehanna river.

The party of Prof. Merriman occupied in succession the stations Knob, Bear's Head, Pimple Hill, Smith's Gap, Bake Oven, and Port Clinton. Five new stations were marked, four towers erected, and 30 primary and 23 secondary directions observed. This work has enabled the geographical positions of Knob, Bear's Head, Pimple Hill, Penobscot, and Panther to be computed, as also the positions of 7 secondary points. The field work of this party began June 23 and closed September 16.

The party of Assistant Tittman extended the reconnaissance northward across the northern anthracite coal field to the New York State line. Angles were measured with a small theodolite at the stations Panther, Penobscot, Shickshinny, Bald, Moosic, Salem, and Elk, with sufficient accuracy to en-

able geographical positions to be determined approximately, and permit the collocation of local maps on a general one. Nine secondary stations were determined in the northern anthracite coal field. The field work of this party began June 23 and closed October 24.

The party of Prof. Barnard was engaged in reconnoitering and the erection of towers. He occupied, for the measure of horizontal angles, the station Dauphin, unfavorable weather preventing the occupation of other stations.

The accompanying map shows the present condition of the geodetic survey of the State. The lines which are drawn broken denote reconnaissance only, while the full lines denote that the angles have been measured and the triangulation proper completed.

The primary coast triangulation connecting the stations Principio, Meeting-house, Lippincott, Yard, etc., is seen near the south-eastern part of the State, and resting upon it is seen the horse-shoe chain previously described. Westward of the Susquehanna the reconnaissance extends to the foot of the Alleghenies, and in the south-western part of the State a scheme of reconnaissance is indicated, extending from the Maryland triangulation westward over the mountains. In the north-western corner of the State is shown the triangulation of the Lake Survey. North of the State line, near longitudes 76° and 77°, are shown triangles of the New York State Survey, five of whose stations fall south of the boundary. Connecting these stations with the triangulation near latitude 41°, is seen the reconnaissance executed during the season of 1885 by Assistant O. H. Tittman. The scale of the map is 1 : 1,000,000, or 1 inch to about $15\frac{3}{4}$ miles.

4. Geographical Positions and Results.

The latitude and longitude of a station determine its position on the earth's spheroid. In addition to these it is always important to know the distance and direction from the station to each of the neighboring ones, in order to be able to extend the triangulation or use it for local surveys. The complete statement of a geographical position, hence, includes distance azimuth, latitude, and longitude.

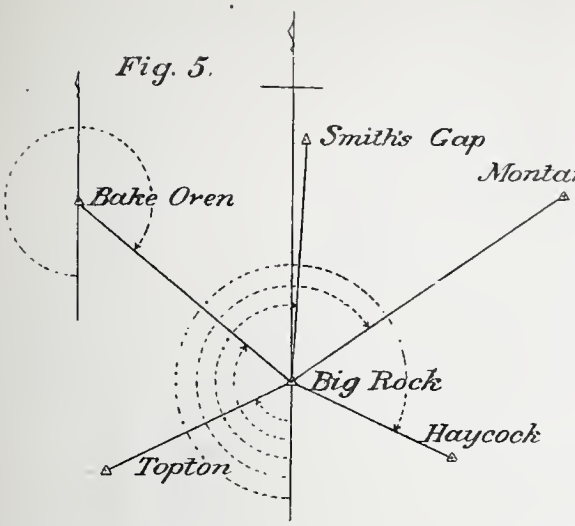
The unit of distance employed by the Coast and Geodetic Survey is the meter. The following constants are adopted, from the latest comparisons, to convert meters into feet and miles when necessary :

$$\text{Meters} \times 3.280869 = \text{Feet.}$$
$$\text{Meters} \times 0.000621377 = \text{Miles.}$$

If the logarithm of the distance in meters be known, the conversion may be made as follows :

$$\text{Log meters} + 0.5159889 = \text{Log feet.}$$
$$\text{Log meters} + 6.7933550 = \text{Log miles.}$$

The azimuth of a line is an angle which denotes the direction which that line makes with the true meridian. This angle is always measured at one end of the line with respect to a true meridian passing through that end.



On the Coast and Geodetic Survey azimuths are reckoned from the south around through west, north, and east, from 0° to 360°, so that true south has the azimuth 0°, west 90°, north 180°, and east 270°. Hence the true bearing of a line is at once known when its azimuth has been determined, azimuth and true bearing being, indeed, but different formal statements of the same thing. For example, at the station Big Rock, the following are the azimuths and true bearings to the five stations shown in Fig. 5. It will be seen from the figure that the azimuths likewise give all the angles between the stations

AT BIG ROCK.	Azimuth.	True bearing.
To Topton,	64° 54′ 36.81″	S. 64° 54′ 36.81″ W.
To Bake Oven,	129 13 35.82	N. 50 46 24.18 W.
To Smith's Gap,	182 33 18.74	N. 2 33 18.74 E.
To Montana,	235 05 46.52	N. 55 05 46.52 E.
To Haycock,	294 32 22.86	S. 65 27 37.14 E.

at the point Big Rock. For instance, the angle Bake Oven Big Rock-Topton is 64° 18′ 59.01″, the difference of the azimuths Big Rock-Bake Oven and Big Rock-Topton.

On account of the spheroidal shape of the earth the meridians are not parallel but converge toward the poles. If the surface of the earth were plane the azimuth of the direction Bake Oven to Big Rock (in Fig. 5) would be exactly 180° greater than that of the direction Big Rock to Bake Oven, but actually we have the azimuths :

Big Rock to Bake Oven, 129° 13′ 35.82.″
Bake Oven to Big Rock, 309° 02′ 01.43.″

In this particular case, then, the convergence of the meridians has caused the true bearing of the line taken at Big Rock to be 11′ 34.39″ greater than the true bearing of the same line taken at Bake Oven.

Owing to the spheroidal shape of the earth, the lengths of the degrees of latitude and longitude are different for different latitudes. As it is constantly necessary to transform differences of latitude and longitude into the corresponding linear distances on the earth's surface, extended tables for this purpose are given in the Report of the Coast and Geodetic Survey for 1884, pp. 135–321. The following values extracted from these tables show the variation in length of arcs of the meridian for latitudes from 39° to 43°:

LATITUDE.	LENGTH OF ARCS OF THE MERIDIAN IN METERS.		
	One degree.	One minute.	One second.
39	111013.3	1850.22	30.837
40	111032.7	1850.54	30.842
41	111052.2	1850.87	30.848
42	111071.7	1851.20	30.853
43	111091.4	1851.52	30.859

These quantities give the number of meters contained within an arc of the meridian of which the degree of latitude is the middle; thus, 111032.7 is the number of meters between latitude 39° 30′ and latitude 40° 30.′

The following values, taken from the same tables, show the variation in length of arcs of the parallel for latitudes from 39° 30′ to 42° 30′:

LATITUDE.	LENGTH OF ARCS OF THE PARALLEL IN METERS.		
	One degree.	One minute.	One second.
39° 30′	86 016	1433.6	23.89
40 00	85 396	1423.3	23.72
40 30	84 770	1412.8	23.55
41 00	84 137	1402.3	23.37
41 30	83 498	1391.6	23.19
42 00	82 853	1380.9	23.01
42 30	82 201	1370.0	22.83

In the following geographical positions the values of the latitudes and longitudes which have been finally determined are given to thousandths of a second of arc, while those which are liable to further revision are stated to seconds only. From the above tables it is seen that a thousandth of a second of latitude is about 0.03 meters or 0.1 feet.

The following are the geographical positions for the stations of the horse-shoe chain (see plate and map) which are situated in Pennsylvania. These positions have been previously published in the Reports of the Secretary of Internal Affairs for Pennsylvania for 1883 and 1884. In each case a brief statement of the location of the stations is given. The stations are marked by stone monuments, or by bolts in the rocks, and are always well known by the people of the vicinity.

Rawlinsville Station.—This is situated near the village of Rawlinsville, in the eastern part of Martic township, Lancaster county.

Latitude, 39° 53′ 09.539.″ Longitude, 76° 15′ 58.372.″

To Gov. Dick, ...	azimuth,	158°	02′	34.80,′	distance,	43157.9	meters.

The following geographical positions for four stations of the primary coast triangulation were determined about the year 1842 :

Bethel Station.—Situated in Bethel township, Chester county :
Latitude, 39° 50′ 46.232.″ Longitude, 75° 29′ 25.339.″

To Yard,	azimuth,	211°	55	50.45,″	distance,	16670.5	meters.
To Pine Hill,	"	276	57	08.56,	"	42882.7	"
To Lippincott,	"	312	12	40.11,	"	20435.9	"
To Burden,	"	345	02	06.81,	"	36300.7	"

Yard Station.—Situated in Chester county :
Latitude, 39° 58′ 24.796.″ Longitude, 75° 23′ 13.793.″

To Bethel,	azimuth,	31°	59′	48.83,″	distance,	16670.5	meters.
To Mt. Holly,	"	266	12	22.78,	"	51215.8	"
To Pine Hill,	"	299	52	41.80,	"	38898.4	"
To Lippincott,	"	347	17	38.94,	"	28585.5	"

Willowgrove Station.—Situated near the west corner of Moreland township, in Montgomery county :
Latitude, 40° 08′ 31.935.″ Longitude, 75° 06′ 22.283.″

To Newtown,	azimuth,	232°	34′	04.10,″	distance,	19892.3	meters.
To Mt. Holly,	"	299	41	41.15,	"	31209.0	"
To Pine Hill,	"	345	47	35.64,	"	39375.9	"

Newtown Station.—Situated in Newtown township, Bucks county :
Latitude, 40° 15′ 03.411.″ Longitude, 74° 55′ 13.927.″

To Willowgrove,	azimuth,	52°	41′	15.47,″	distance,	19892.3	meters.
To Goat Hill,	"	171	57	31 31,	"	10638.4	"
To Mt. Rose,	"	232	10	19.50,	"	21153.1	"
To Stony Hill,	"	296	34	57.01,	"	32233.9	"
To Mt. Holly,	"	337	47	34.42,	"	29784.1	"

The following are approximate latitudes and longitudes of primary stations to the westward and northward of the horse-shoe chain. These will be determined with greater precision when the final adjustments are made, or when additional field work is done. Hence the values are stated only to the nearest second :

	Latitude.	*Longitude.*
Winterstown, (York county,)	39° 49′ 22″	76° 36 09″
Pulpit Rock, (York county,)	39 51 27	76 56 53
Round Top, (York county,)	40 06 13	76 55 34
Dauphin, (Dauphin county,)	40 21 59	76 54 33
Swatara Gap, (Lebanon county,)	40 28 15	76 32 24
Bear's Head, (Schuylkill county,)	40 51 01	76 04 48
Knob, (Carbon county,)	40 53 44	75 49 45
Pimple Hill, (Monroe county)	41 01 36	75 30 18
Penobscot, (Luzerne county,)	41 10 57	75 52 22
Panther, (Luzerne county,)	41 14 09	75 38 11
Ricketts, (Sullivan county,)	41 18 31	76 18 35
Bald, (Lackawanna county,)	41 25 41	75 45 05
Moosic, (Lackawanna county,)	41 27 21	75 29 44
Elk, (Susquehanna county,)	41 42 54	75 33 39

The following are the approximate latitudes and longitudes of a number of secondary stations and points. Besides the three stations in Philadelphia for which accurate positions are given, there are many more in that city and in the vicinity and along the Delaware river. These can be had on application to the Survey office :

	Latitude.	*Longitude.*
Philadelphia, State House,	39° 56′ 55.64″	75° 09′ 01.41″
Philadelphia, Girard College,	39 58 26.600	75 10 13.544
Philadelphia, St. Peter's Church,	39 56 35.34	75 08 53.38
Lancaster, prison tower,	40 02 24.58	76 17 33.52
Bethlehem, Reformed Church,	40 37 17	75 22 33
Lone Tree, (Carbon county,)	40 48 11	75 52 44
Summit Hill, school-house tower,	40 49 36	75 52 27
Summit Hill, Presbyterian Church,	40 49 33	75 52 24
Summit Hill, Catholic Church,	40 49 28	75 52 52
Mt. Jefferson, South Chimney,	40 49 32	75 51 28
Woodside, Catholic Church,	40 00 37	75 54 27
Shickshinny, (Luzerne county,)	41 09 59	76 09 09
Nanticoke, German Lutheran Church,	41 12 16	76 00 02
Wilkes-Barre, St. Mary's Church,	41 14 32	75 53 04
Bellevue, Welsh Methodist Church,	41 24 04	75 41 14
Hyde Park, St. Patrick's Church,	41 24 51	75 41 03
Petersburg, German Lutheran Church,	41 24 38	75 38 30
Providence, St. Mary's Church,	41 26 27	75 39 30
Olyphant, Baptist Church,	41 28 23	75 36 24
No. 10, chimney of engine-house on Pa. Coal Co.'s Gravity Road,	41 24 39	75 34 21
Scranton court-house, clock tower,	41 24 29	75 39 47
Salem, (Wayne county,)	41 33 01	75 27 26

In order to make the list of geographical positions thus far geodetically determined in Pennsylvania more complete, the following are given, the first and second of which are taken from the Report of the Primary Triangulation of the Lake Survey, p. 782, and the others from the Reports of the New York State Survey for 1883 and 1884:

	Latitude.	*Longitude*
Edinboro', (Washington township, Erie county.)	41° 52′ 28.41″	80° 10′ 46.88′
Erie, (Mill Creek township, Erie county,)	42 03 41.44	80 11 11.64
Bly, (Tioga county,)	41 54 35	77 00 41
Harrison, (Potter county,)	41 54 58	77 41 52
Athens, (Bradford county,)	41 57 31	76 37 00
Litchfield, (Bradford county,)	41 59 22	76 25 49
Warren, (Bradford county,)	41 59 22	76 10 44

In 1884 the Philadelphia water department located the positions of several points in Bucks and Montgomery counties, starting from the line Haycock-Goat Hill as a base, and a statement of the computed positions is given in their report for that year, page 322.

The Coast and Geodetic Survey has determined astronomically the latitude and longitude of the Capitol at Harrisburg, of the south-west corner of Pennsylvania, and of several other points upon the boundary lines of the State. The latitude and longitude of Pottsville and Wilkes-Barre have been determined for the Second Geological Survey of Pennsylvania by Prof. C. L. Doolittle. The following are the values obtained:

	Latitude.	*Longitude.*
Harrisburg, dome of Capitol,	40° 15′ 51.1″	76° 52′ 54.3″
South-western corner of Pa.,	39 43 18.19	80 31 08.20
Boundary monument, near Smith's Ferry,	40 38 27.25	80 31 07.50
Wilkes-Barre, court-house,	41 14 40.48	75 52 57.7
Pottsville, court-house,	40 41 09.13	76 11 50.7

The following positions of the astronomical observatories at Allegheny and Bethlehem are taken from the *American Ephemeris and Nautical Almanac* for 1886:

	Latitude.	*Longitude.*
Philadelphia Old High School Observatory,	39° 57′ 06.0″	75° 09′ 45.2′
Allegheny Observatory, ...	40 27 41.6	80 00 43.95
Bethlehem Observatory, ...	40 36 23.9	75 22 58.5

In conclusion it may be mentioned that the above longitudes are referred to the meridian of Greenwich by using the value 77° 03′ 01.35″ as the longitude of the Naval Observatory at Washington, D. C. A recent discussion by Assistant C. A. Schott in the Report of the Coast and Geodetic Survey for 1884, pages 407–430, deduces for this value the more precise quantity 77° 03′ 00.57,″ with the probable error ±0.63.″

PROGRESS OF THE TRIANGULATION IN 1886.

Contributed by Prof. MANSFIELD MERRIMAN, *at the request of the Superintendent of the U. S. Coast and Geodetic Survey.*

Prof. Louis H. Barnard took the field on May 26, and continued at work until June 26. He visited, for the purposes of reconnaissance, the stations Blue Rock, Anderson, Mexico, Doubling Gap, Piney mountain, Clark's Knob, and Two-Top mountain. Reconnaissance angles were measured at these points on eleven days, unfavorable weather preventing observations on twelve days.

The party of Prof. Merriman was in the field eight days during June. The stations White Horse, Bear's Head, Barry, and Catawissa were visited. At White Horse a signal was erected, and at Barry an observing tripod and scaffold twelve feet high were constructed, lines being also cut through the woods to render the adjacent stations visible.

By direction of the Superintendent of the Coast and Geodetic Survey all work in Pennsylvania was closed before June 30, the end of the fiscal year, on account of the failure of the House to provide an appropriation for the continuance of the work in the States. The Senate, however, insisted upon the item, and early in August an appropriation of about one half the usual amount was passed, but with the proviso that the preference should be given to States where few or no points had been furnished. It was, therefore, only possible to continue one party at work in Pennsylvania during the remainder of the season.

On August 5, Prof. Merriman took the field, and during that month occupied the stations Bear's Head and Barry, in order to continue the triangulation to the northward and westward of the anthracite coal fields. The stations Catawissa, Ricketts, Shickshinny, and Montour were marked and observed upon. The observations at Bear's Head were completed on August 21, 498 measures of horizontal angles having been made. Barry station was next occupied, and the observations there continued by Prof. Merriman until August 31, and later by Assistant William Einbeck, who subsequently continued the triangulation at Catawissa station.

The occupation of Catawissa includes, besides the horizontal angle observations, also the determination of the zenith distances of all the stations centering there, viz: Little Mahanoy, Montour, Loyalsock, North mountain, Ricketts, Penobscot, and Bear's Head. Little Mahanoy mountain has also been determined as a secondary point. Substantial tripods and target signals were set up at nearly all these points, but the work of observation

upon all the longer lines was finally carried out by means of heliotropes, the signals failing to show satisfactorily on account of continuously smoky and hazy weather.

The work of the season has determined the accurate geographical positions of Barry, Catawissa, Montour, and Ricketts, but, as the field work of Assistant Einbeck was not closed until late in November, the computed positions are not available for statement in this report.

RAINFALL AT BETHLEHEM, PA.

The town of Bethlehem is in latitude 40° 37′ north and 75° 23′ west, and is located on the north bank of the Lehigh river, ten miles from its junction with the Delaware. On the south bank the Lehigh, or South Mountain, rises gradually to an elevation of 900 feet above tide; the summit being a mile and a half from Bethlehem. To the north lies an undulating country—the valley between the Blue mountain and the South mountain. The former is 18 miles distant, and has a uniform elevation of 1,500 feet. The direction of the valley is south-west by west. The town is situated on a hill, sloping to the south and west, and is bounded on the west by the Monocacy creek, flowing from the north. The Lehigh canal follows the course of the river on its north bank. The river has an elevation of 220 feet, while the highest elevation of the town is 350 feet at a point on East Broad street.

The observations which form the basis of this article were carefully recorded and very kindly furnished by Mr. J. E. Lukenbach, who began his observations in July, 1877. His rain-gauge consists of a cylindrical galvanized iron vessel, 10 inches in diameter and 12 inches deep, in which the rain is caught. It is placed at the surface of the ground, twenty feet west of his house, which is on the west side of Main street, just north of Broad. The elevation here is about 270 feet above tide, or 40 feet above the Monocacy creek, which is 200 feet distant. The rainfall is measured in a cylindrical glass vessel, on which is a decimal scale, each main division corresponding to one tenth of an inch; these being subdivided into tenths' give the rainfall to hundredths of an inch.

For the last six months of the year 1877, the monthly rainfall was as follows: July, 6.50 inches; August, 6.64; September, 3.23; October, 6.31; November, 5.40; and for December, 1.60 inches; making a total of 29.68 inches. The following table gives the monthly and yearly rainfall at Bethlehem from January 1, 1878, to January 1, 1886.*

	1878.	1879.	1880.	1881.	1882.	1883.	1884.	1885.	M'thly M'n.
January,	4.52	None.	2.95	4.06	3.32	4.32	2.38	4.43	3.242
February,	3.25	1.23	2.86	2.43	3.90	4.04	4.85	3.65	3 276
March,	2 75	3.41	4.13	5.48	4.91	2.71	5 04	1.04	3.684
April,	2.92	3.98	3.50	1.00	2.19	2.79	2.41	2.36	2.644
May,	4.65	2.17	1.26	2.87	6.58	2.88	2.86	2 29	3.195
June,	3 50	8.38	3.88	6.08	3.28	8.62	4.76	1.06	4 945
July,	5.28	4.64	4.17	1.36	2.77	4.52	8.13	2.76	4.129
August,	2.03	6.03	2.50	0.59	3.54	1.55	2.49	9.17	3.487
September,	2.49	1.90	2.47	0.90	5.25	4.20	1.03	0.55	2 348
October,	3.40	0.81	1.85	2.90	2.70	5.16	3 64	4.92	3.172
November,	3.44	1.84	2.73	2.72	1.32	1.54	2 71	4 28	2.572
December,	5.60	5.54	1.71	4.61	1.62	2.59	6.05	1.60	3.665
Annual rainfall,	43.83	39.33	34.01	35.00	41.38	44.92	46.35	38 11	40.36

*The rainfall for 1886 is as follows: January, 3.63 inches; February, 4.69; March, 4.08; April, 2.98, and for May, 5.59 inches.

From this table it is seen that the mean annual rain-fall is 40.36 inches. One cannot fail to note the secular variation in the annual rain-fall; for the first three years it shows a gradual decrease, then a corresponding rise for four years, which is quite remarkable in its regularity. In 1880 the annual rain-fall was a minimum, 34.01 inches, and reached a maximum of 46.35 inches in 1884. Although the seasons here are not so marked by an abundance or a want of rain as in the tropics, still there is some difference in rain-fall. For the spring months, the mean is 9.52 inches; for summer, 12.76 inches; for fall, 8.09 inches, and for winter, 10.18 inches. The fall months might be considered the dry season, the remainder of the year constituting the wet season.

From the record of the number of days given in the following table, in which rain fell, it is found that rains occur with about the same frequency in winter as in summer, and in spring as in fall, which shows that the showers are heaviest in spring and summer:

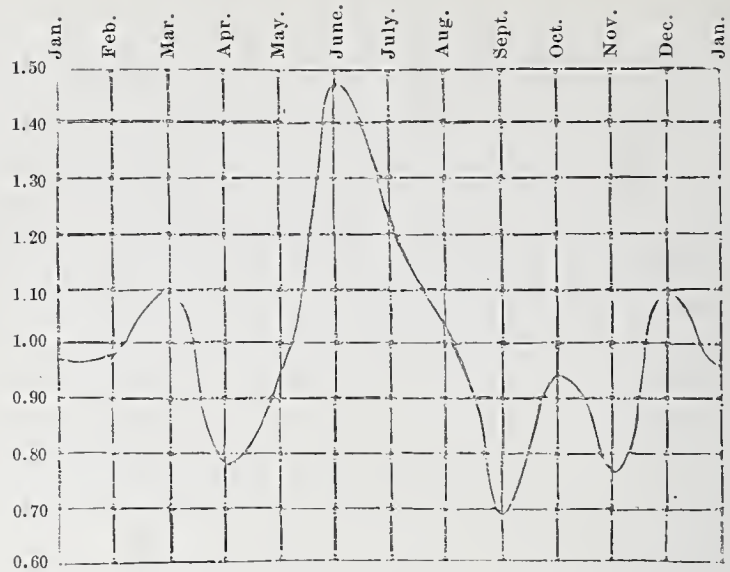
	1881.	1882.	1883.	1884.	1885.	Mean.
January,	4	4	8	9	5	6 0
February,	3	6	9	8	6	6.4
March,	5	6	4	6	5	5.2
April,	2	4	6	4	8	4.8
May,	7	11	9	8	8	8.6
June,	11	7	7	6	6	7.4
July,	5	4	9	8	10	7.2
August,	3	6	3	7	9	5.6
September,	3	6	6	3	5	4.6
October,	8	5	8	10	7	7.6
November,	7	5	5	5	10	6.4
December,	6	5	8	7	8	6.8
Total,	64	69	82	81	87	76.6

From this table it is seen that the average number of days in the year in which rain falls is 76.6, which give an average of 0.53 inches for each day of rain. In 1882, this averaged 0.60 inches, a maximum; and in 1885, it was a minimum, 0.44 inches.

The following is a table of the means with their ratios to the mean monthly precipitation, which is 3.363 inches:

Month,	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.
M'n rainfall.	3.24	3.28	3.68	2.64	3.19	4.94	4.13	3.48	2.35	3.17	2.57	3.66
Ratio,	0.964	0.974	1.095	0.786	0.950	1.470	1.228	1.037	0.698	0.943	0.765	1.090

With these ratios as ordinates and the months as abcissas, the following curve is drawn, which is a good graphical representation of the relative monthly rain-fall:



From this it is readily seen that June is the wettest month, and September the driest. The maximum monthly fall recorded is 9.17 inches for August, 1885; and the minimum is 0.0 inches for January, 1879.

Since 1880, the following rain-storms, having a fall of one inch or more, have occurred :

Date.	Amt.	Date.	Amt.	Date.	Amt.
1881.	Inches.	1883.	Inches.	1885.	Inches.
January 10,	2.45	February 14,	1.07	January 6.	1.38
January 21.	1.06	April 23,	1.08	January 11.	1.27
February 11,	1.13	June 18,	1.00	February 9.	1.52
March 9.	1.36	June 26 and 27,	6.46	February 16,	1.26
March 19,	1.33	July 15,	1 92	April 4,	1.08
March 31,	1.39	September 17,	1.37	August 1,	1.18
May 6,	1.07	October 20 and 23,	2.34	August 3.	4 45
June 27.	1.54	October 29,	1.20	August 7.	1.10
December 1,	1.13	1884.		October 21,	1.65
December 22,	1.05	February 28,	1 08	November 2,	1.08
1882.		March 9,	1 77	November 9,	1.01
January 21.	1.05	March 19,	1.26	1886.	
February 21,	1 34	April 9,	1.19	January 4.	1.75
March 1.	2.16	June 25 and 26,	4 22	February 12,	1.81
March 27,	1.00	July 4,	1.50	February 25,	1.29
June 26,	1.02	July 5,	1.07	March 21,	1.03
September 11.	1 04	July 11,	2.71	April 6,	1.12
September 22,	1 37	July 27,	1.00	April 7,	1.10
September 26,	1.30	October 29.	1.20	May 7 and 8,	2 83
1883.		December 6.	2.10	May 13,	1.58
January 13,	1.00	December 14,	1.05		
January 20,	1.00				

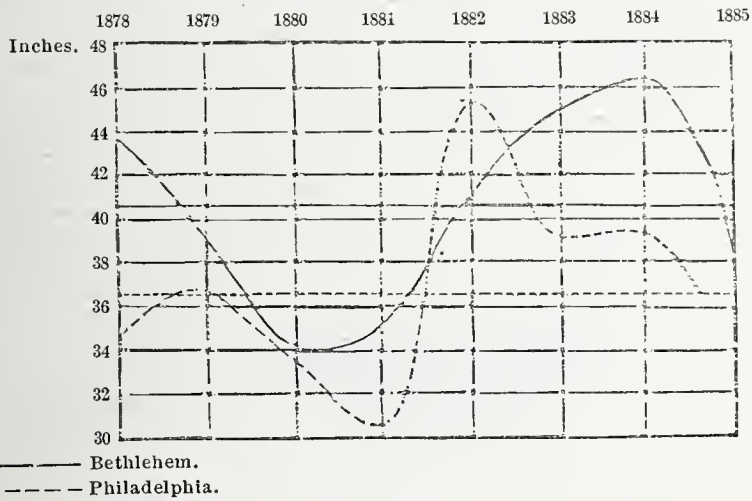
Several noticeable coincidences occur in these rain-storms ; the most remarkable being the heavy rain-falls that came on the 26th and 27th of June, for four consecutive years. The June rain-fall of last year was exceptionally light, the heaviest shower being only 0.64 inches, and, it might be remarked, that a quarter of an inch of rain fell on the 27th.

On the occasion of the two heavy storms last year, one on July 29th, when 0.94 inches fell in 30 minutes, and the other on August 3d, when 3.00 inches fell in four hours, the culverts were entirely inadequate, several be-

ing washed away, and much of the lower part of town was flooded. The storm on July 29 was a mixture of hail and rain, and caused a rise in the Monocacy of five feet in 35 minutes, and in two hours it had risen seven feet, which was unprecedented.

The following is a comparison of the yearly rain-fall of Bethlehem with that of Philadelphia :

	1878.	1879.	1880.	1881.	1882.	1883.	1884.	1885.	Mean.
Bethlehem, .	43.83	39 33	34.01	35.00	41.38	44 92	46.35	38 11	40.36
Philadelphia, . . .	34.53	36.75	33.58	30.20	45.58	39.17	39.34	33.35	36.56



M. D. PRATT.

APPENDIX.

BOARD OF PROPERTY.

A Board of Property, consisting of the Attorney General, Secretary of the Commonwealth, and Secretary of Internal Affairs, is authorized by law. Their powers are to "hear and determine in all cases of controversy on caveats, in all matters of difficulty or irregularity, touching escheats, warrants on escheats, warrants to agree, rights of preëmption, promises, imperfect titles, or otherwise, which heretofore have, or hereafter may, arise, in transacting the business of the said Land-Office."

The present Board consists of :

LEWIS C. CASSIDY, *Attorney General.*

WILLIAM S. STENGER, *Secretary of the Commonwealth.*

J. SIMPSON AFRICA, *Secretary of Internal Affairs.*

Clerk of the Board, J. W. GREENLAND.

Stated meetings of the Board will be held on the Wednesday following the third Tuesday of each alternate month of the year 1887, to wit: January 19, March 16, May 18, July 20, September 21, and November 16.

Regulations.

I. A caveat may be entered against the granting of a warrant, acceptance of a survey, or granting of a patent. It must be in writing, and addressed to the Secretary of Internal Affairs. A particular form is not required, but the application, survey, or other office-right against which it is entered, together with the reason for filing the same, should be distinctly stated.

II. A caveat entered against the granting of a warrant on any application on file bars the issuing of a warrant, unless, after hearing upon a citation, the Board should dismiss the same.

III. No caveat, note on survey, nor writing in the nature of a caveat, shall continue to bar the issuing of a patent to the person or persons against whom such caveat may be entered during a longer period than two years, unless the parties interested in the land shall within the term mentioned take out a citation thereon, in order to bring such dispute to a decision and prosecute the same to effect.

IV. A citation will be issued on a pending caveat on the application of any party in interest. Thirty days' notice must be given to the opposite party of the time at which the case will be heard by the Board, and either party desiring to take the depositions of witnesses to be read at the hearing is required to give the other ten days' notice of the time and place for the taking of such depositions.

V. The party who enters a caveat becomes plaintiff in the issue joined,

and at the hearing shall open the case and may make the concluding argument.

VI. A petition for the re-hearing of a case that has been heard and decided will not be considered unless the party presenting the same shall furnish evidence that the opposite party has had at least ten days' notice of the intention to present said petition.

VII. A petition for an order of re survey must recite the name of the warrantee, and date of warrant upon which the former survey was made, and state the reasons for such re-survey.

VIII. Depositions of witnesses submitted to the Board become a part of the record, and cannot be withdrawn.

IX. Citations must be returned to the Department of Internal Affairs on or before the days fixed therein for the hearing of the cases in which they are issued. All acceptances of notice and agreements to continue cases must be in writing.

X. Parties will be heard in person or may be represented by counsel, as they may elect.

XI. The fees to be charged for the use of the Commonwealth in business relating to the Board are as follows:

Entering caveat,	$1 00
Issuing citation,	1 00
Recording application for re-survey,	1 00
Order of re-survey,	1 00
Copy of action or determination of Board,	1 00

XII. All communications for the Board should be addressed to the Secretary of Internal Affairs.

WARRANTS AND SURVEYS.

A warrant or order of survey authorizes only the survey of vacant lands, for they alone belong to the Commonwealth to grant; but whether the lands applied for are vacant or not, the land officers do not undertake to examine, and in most instances do not possess the means of ascertaining. Of this the applicant must judge for himself. If he knows them to be appropriated by prior right, it is against conscience to take out a warrant for them, or to have them surveyed as vacant. But he may assert the invalidity of a former grant, and insist on a survey. In that case, the deputy surveyor ought, if it be known to him, to note it in his books and return of survey.

RETURNS OF SURVEYS.—Having finished the survey and plotted it, the surveyor ought to return it to the office of the Secretary of Internal Affairs. This is an important part of his duty. Many regulations and laws have, from time to time, required it, and from its omission frequent disputes have occurred. The deputy surveyor, however, is not obliged to return the survey until his fees and expenses are paid; and if the failure to return is occasioned by the neglect or refusal of the party to defray them, any loss thereby sustained is imputable to him, and not to the officer. The regulations of the Proprietaries and the acts of Assembly concur in directing the

return to be made on paying for the survey. * * * If the party pays or tenders the fees, it is the duty of the surveyor to return the survey in a convenient time, and the neglect or fraud of the surveyor will not affect his rights. But it lies on the party to show that the want of the return was not occasioned by any default or neglect of his own; and, if there is nothing to show that the surveying fees were paid, the inference is that they were not paid. The deputy, being a sworn officer, is, *prima facia*, presumed to have done his duty.

PATENTS.

The patent is a deed from the Commonwealth, under its great seal, conveying to the grantee all its right in the land, describing it by metes and bounds, and passes, as respects the Commonwealth, the complete legal title, all the preparatory measures of warrant, application, survey, and acceptance being merged in the patent. As to third persons, it is *prima facia* evidence that all the previous requisites had been complied with. Before it issues, the purchase money due, [and the patent fee,] must always be paid; and the land is thenceforth discharged from the lien which till then existed. Generally, the grantee is concluded by the lines and boundaries described in the patent, though perhaps in a special case there might be an exception.

Third persons claiming by warrant, application, settlement, or otherwise may show that the patent was wrongfully issued to the patentee; or, rather, that he is trustee for him who has the right, the material consideration being, not who has the patent, but to whom it ought to have been granted—for the land officers, in issuing the patent, act merely in a ministerial capacity, and cannot change the rules of law or rights of parties. And even though he who has the patent sell to a *bona fide* purchaser without notice, the vendee is in no better situation. His claim under the patent may be contested by one having a better right by settlement, warrant, or location. These titles are not equities within the ordinary rule of being unavailing against a purchaser of the legal title. A patent founded on a fraudulent survey, or obtained by misrepresentation and deceit, is void against third persons affected by it.

The patent, however, has always be received in evidence in the first instance, to show that the legal title was out of the Commonwealth. The question whether it is good is a subsequent one.—*Sergeant's Land Laws, p. 155.*

The following regulations, relative to issuing patents, are published for the information and guidance of owners of unpatented lands:

1. The patent must issue to the actual owner of the land, or party holding title under the warrantee, or to the executors, trustees, or heirs and legal representatives of the person in whom title was vested at death, or to the guardians of minor children of the deceased.

2. Warrantees who remain the owners of the land warranted and sur-

veyed to them can obtain patents in their own names, (if no caveat remains undetermined,) without furnishing any brief or statement of title, upon payment of back purchase money, interest, and fees.

3. Executors, trustees, and guardians representing the warrantee, or his heirs, who apply for patents, should produce evidence of their appointment as such.

4. When the land has passed out of the ownership of the original warrantee, or party who took out the office right, the applicant for patent will be required to furnish evidence of ownership.

5. The present owner of a part of a tract of land surveyed in pursuance of any given warrant, desiring to have a patent in his own name, can obtain it by having the county surveyor make return of survey of such part. In making the survey, the county surveyor must, besides giving the courses and distances and quantity of acres, in the particular part, indicate the residue of the original tract by dotted lines. The applicant will only be required to pay his proportion of the whole amount due on the tract, with fees. Evidence of ownership to accompany application.

6. When an unpatented original tract has been sold and sub-divided, the several present owners may unite in an application for patent and statement of title, and, upon payment of amount due, with patent and other fees, a patent will issue to them, the said applicants, their heirs and assigns, according to their respective rights and interests, without setting forth the particular interest of each.

7. In cases where it is difficult to submit the evidence of title required by this Department, in order to obtain a patent, any one or more of the owners of the unpatented tract can, through this Department, discharge the lien against said tract by the payment of the purchase money, interest, and fees, shown to be due by the land lien docket, and the interest since accrued, and a patent can at any time afterward be issued to those entitled to it, upon proof of ownership.

8. The accounts in the lien dockets are calculated to June 1, 1868. If to the amount due, as shown in its proper column, there be added the interest accruing from June 1, 1868, to the date of forwarding the docket to the prothonotary, at the rate given in the column of rate per cent. of interest, and on this sum interest be calculated at the rate of six per cent. from the time of forwarding the docket until the date of the application for patent, it will give the amount required to procure a patent. (See 2d sec. of the act of the 20th of May, 1864, printed on a subsequent page.) But interest is not charged on patent or other fees. (See act of the 5th of May, 1871.)

A statement of the amount due on any particular tract or tracts, or any other information in relation thereto, will be promptly furnished on application to this Department.

Persons sending money to the Department of Internal Affairs for pay

ment of arrears on unpatented lands and for records, &c., should send by registered letter, postal order, or express. Drafts, checks, or post-office money-orders must be made payable to the order of the Secretary of Internal Affairs.

MISCELLANEOUS.

An indorsement, say for example, "Returned, &c., February 22, 1815," which is frequently found on copies of warrants and surveys, does not mean the date at which the return or survey was received at this office, but the date at which the Surveyor General made a return of the tract to the Secretary of the Land Office for patenting. And when such indorsement is found on the back of a copy of a warrant or survey, even at the date at which the office of the Secretary of the Land Office was discontinued, it is an evidence, in perhaps more than ninety-nine cases out of one hundred, that the tract is patented. Some exceptions have been found. Why the custom of marking the warrants and surveys thus, when a tract was patented, after the office of the Secretary of the Land Office was abolished on the 10th of May, 1844, is not apparent. This custom was discontinued on the 1st of January, 1868, and the indorsement, "Patented to ————, 18—," was substituted.

A mistaken idea, prevalent with many people not familiar with the Land Office, is that the Department has connected drafts, showing the location of every tract of land surveyed in the several counties, and that, therefore, whatever of vacant land there may be in the State can be readily found out at this office, and that information can, without difficulty, be given as to the adjoining surveys of any named tract, without advising the Department of the names and dates of the warrants upon which such surveys were made. Had the lands of the Commonwealth been first surveyed and afterwards sold, this idea would have been correct, but the very reverse was the fact, for the lands were sold and warrants for subsequent surveys issued. And, because of this policy, the Department has only single and unconnected copies of the surveys. Unless a given survey calls for warrantee adjoiners, it would be a work altogether out of proportion to the fees allowed to undertake to search out all the warrants and surveys, perhaps for a whole county, in order to find the adjoining tracts, or search for a supposed vacant piece of land; but the task is comparatively easy when the party seeking the information learns, as he can more readily do from the county surveyor, or persons in the neighborhood, the names of all the surrounding warrantees and dates of warrants, and communicates that data to this Department.

It will be observed, from the foregoing, that in communication with the Department, it is of the first importance to give the name of the warrantee and date of warrant of the survey or patent about which inquiry is made; but when the date of warrant cannot be given, the party asking for official copies or information should give quantity of acres, location, and any other data in his possession that will aid in searching for the tract.

Frequently applications for warrants for land, made out in due form, are sent to the Department unaccompanied by the purchase money and warrant fee. Of course the warrants cannot issue until the proper amount of money is paid into the State Treasury, and the applications thus made gain no priority over others that might be made for the same lands until all the requirements of law are complied with.

The law does not contemplate that credit should be given on account of fees for searches and official copies, and, therefore, to save correspondence, and insure more speedy attention, the proper amount of fees should be sent with each order. If too much is forwarded, the surplus will be promptly returned, with the official papers asked for.

DATES.

At which the county land lien dockets, prepared under the act of the 20th of May, 1864, and the supplement of the 4th of April, 1868, were forwarded to the prothonotaries of the several counties.

INSTRUCTIONS TO COUNTY SURVEYORS.

I. Execution of Warrants.

1. You shall faithfully execute every warrant that shall be directed to you from this Department, to the best of your skill, knowledge, and understanding, *according to the express words* and order of such warrants, and not otherwise.*

2. You shall not make use of any chain-carriers but such as are of good character, who shall take a solemn oath, (which you are authorized by law to administer,) justly and exactly to execute their trust, without favor, partiality, or affection.†

3. You will, on no pretense, execute new warrants upon lands heretofore surveyed on old warrants or orders, but report, as nearly as may be, the circumstances relating to the same. And before you make return of any lands by you surveyed on new warrants, endeavor to be satisfied that no warrant of an earlier date has been issued for the same land; and on your return, certify whether the lands have been improved, and for how many years.‡

4. You must, by no means, execute warrants on any other land than that which they particularly describe; and in order that your returns of survey may appear to be so executed, it will be necessary for you to be particularly attentive to the *adjoiners mentioned in the warrant;* and where there has been any change in them between the issuing and executing of the warrant, it must be noted in your return of survey.§

5. You will be particularly careful in executing warrants granted after the 1st day of June, 1814, and not founded on actual settlement, not to interfere with the rights of settlers, and in all cases where an actual resident settlement is included, note on your return whether it was commenced prior or subsequent to the 28th day of March, 1814.‖

6. You shall not make return of any survey but such as has actually been made on the ground; and you shall take care that all outlines and boundaries shall be fairly and visibly marked before you quit the field.**

II. Returns of Surveys.

7. You are to make a separate return of survey on each warrant or order issued from this Department within six months after the receipt thereof.††

*¶ 1 of instructions of the Commissioners of Property to Isaac Taylor, Proprietary's surveyor for the county of Chester, signed by said Taylor, on the 28th of eleventh month, 1701.

†¶ 6 of same.

‡ Adopted February, 1796.

§ Adopted in 1813.

‖ Adopted in June, 1814.

††¶ 1V of instructions issued in 1765.

**¶ 7 of the instructions issued in 1701.

8. Each return of survey shall conform with the following requirements, to wit:

I. The paper or parchment used to be of the dimensions of at least eight by twelve inches.

II. It must contain a protracted figure of the land, exactly performed, with the field works annexed.*

III. All streams of water, roads, railroads, canals, township, or county lines intersecting or crossing the lines of the survey must be distinctly and visibly marked on the draft at the very place of intersection or crossing, and the distance from the corners expressed in figures on the lines crossed.†

IV. The lines of so much of the adjacent surveys as may serve to show their connection with the survey returned, to be represented on the draft by dotted lines.‡

V. When a survey is bounded by a creek or river, the bearings and distances of the several meanderings must be given.§

VI. Note, whenever they can be obtained, the *warrantee* names of adjoining tracts, as well as the names of the present owners thereof.

VII. The certificate on each return of survey to be made in accordance with the proper form, as printed in the annual reports of the Department.

9. When you return a survey of a part of a tract of land for patenting, you most specify the name of the warrantee, the date of the warrant, and the number of acres contained in the whole tract, and on the draft represent the residue of the tract by dotted lines.‖ But you are, in no event, to make and return to this Department a "resurvey" of a tract, either to include more land or to exclude any part, or in any wise alter the original boundary lines thereof, *unless authorized to do so by an order of the Board of Property.* When an order of resurvey has been issued, and sent to you for execution, you are strictly to follow the directions therein contained.

10. You may make official returns of surveys actually made by your predecessors, after having satisfied yourself of their correctness, and that they have been located according to the calls of the warrants.**

11. Surveys intended to be returned to this Department must be made or approved by you.

12. You may survey and return any surplus not exceeding one hundred acres above the quantity mentioned in the warrant, location, or order of survey. The purchase money for all the surplus land surveyed on warrants must be first paid into the State treasury before the return of survey can be accepted in this Department, of which you will give notice to the owner

*¶ IV of instructions issued in 1765.
† Adopted 1813.

§ From ¶ 3 of instructions issued in 1796.
‖ ¶ 6 of instructions issued in 1813.
** ¶ 9 of instructions issued in 1833.

or owners of such warrant, and always send the money to pay the excess with the return of the survey.*

13. All returns of survey, in order to conform with the files of the Department, should be folded as follows: Double the sheet by bringing the upper and lower edges of the sheet evenly together, then fold in each side so as to make a form about two and seven eighths inches wide, and in length from six to seven inches, according to the size of the sheet. The back of the return should be left blank.

14. With each return of survey send a copy of the tabling and calculation thereof on a separate piece of paper.†

15. All returns to this Department must be under cover, directed to the Secretary of Internal Affairs, with your name subscribed on the back of the paper or envelope inclosing the same.‡

III. Office Duties.

16. You are to keep your office open for the reception of all warrants directed to you, which shall be entered in a book kept for that purpose, distinguishing therein the name of the warrantee, quantity of land granted, date of warrant, and the day when you received it. Also, in another book, you shall keep fair and regular entries, in order of time, of all surveys and resurveys by you made, in pursuance of any warrant or order of survey which you shall receive, with a draft or plot thereof, and field works annexed. And the Secretary of Internal Affairs shall, from time to time, have free access to said books of entries and to all other papers relating to your office, which books and papers shall be delivered over by you to your successor. §

17. Under the provisions of the Constitution of 1873, you are required to keep your office at the county town, but if you desire letters sent to any other address, advise this Department.

18. Before you can enter upon the duties of your office, you must comply with the seventh section of the act of Assembly passed the 9th day of April, 1850, which requires you to take an oath or affirmation, which must be administered in the open court of quarter sessions,‖ and send a copy of said oath, duly certified, to this Department; and have your bond approved by the court, recorded in the office for recording deeds in the proper county, and forward the same to the *Secretary of the Commonwealth*, with one dollar, the fee for filing in his office.

---

*Act of 13th of March, 1817; repealed by act of 6th of April, 1830; restored by act 21st April, 1869.

†Adopted 1853. See forms.

‡Adopted June 7, 1824.

§ ¶ VIII of the instructions of 1765.

‖ Constitution, Art. VII, Sec. 1, requires oath of all county officers to be filed in the office of the prothonotary of the proper county.

RECENT LEGISLATION RELATING TO THE LAND OFFICE.

COUNTY SURVEYORS.

Their Duties.

Under the Proprietary government, deputy surveyors were appointed by the Proprietary, the Commissioners of Property, or the Surveyor General, for certain districts, and given authority to execute warrants or orders, by making surveys and returns thereof to the Land Office. The duties of these deputies were defined by letters of instructions, issued from time to time. Those dated the 28th of eleventh month, 1701, revised and enlarged in 1765, contain such directions as were then deemed necessary for the information and guidance of the deputies, and formed the basis of those now in force. The act of Assembly of the 9th of April, 1781, establishing the Land Office under the Commonwealth, authorized the Surveyor General to appoint a deputy or deputies in any county of the State, who should have power to make and return into the Land Office surveys of land only in the county for which such deputy or deputies shall be appointed; and the act of 1st April, 1784, by virtue of which the Land Office was opened on the 1st day of July following for the sale of the vacant lands of the Commonwealth, directed that its several officers should transact the business of the Land Office, agreeably to the former customs and usages thereof. By subsequent legislation, the duties of the deputies were more clearly defined. The act of the 9th April, 1850, [P. L., 434,] authorized the voters of each county, at the following general election, and every third year thereafter, to elect one competent person, being a practical surveyor, to act as county surveyor for the proper county for the term of three years, who is required to do and perform all the duties which then pertained to the respective deputies of the Surveyor General.

Term of Office.

[*Constitution, Art. XIV.*]

SECTION 1. County officers shall consist of sheriffs, coroners, prothonotaries, registers of wills, recorders of deeds, commissioners, treasurers, surveyors, auditors or controllers, clerks of the courts, district attorneys, and such others as may, from time to time, be established by law. * * * *

SECTION 2. County officers shall be elected at the general elections, and shall hold their offices for the term of three years, beginning on the first Monday of January next after their election, and until their successors shall be duly qualified; all vacancies not otherwise provided for shall be filled in such manner as may be provided by law.

To Keep Office in the County Town.

SECTION 4. Prothonotaries, clerks of the courts, recorders of deeds, reg-

isters of wills, county surveyors, and sheriffs shall keep their offices in the county town of the county in which they respectively shall be officers.

To Hold Office Until Successor is Qualified.

[*Act of 17th April, 1839. P. L., 67.*]

A supplement to an act entitled "An act relative to the election of Auditor General, Surveyor General, and county surveyors by the people," approved April ninth, one thousand eight hundred and fifty.

Section 1. That the persons now or hereafter holding the office of county surveyor shall continue to hold and exercise all the duties appertaining to said office until their successors are duly qualified according to the provisions of the act to which this is a supplement.

Fees.

[*Act of 13th April, 1859. P. L., 696.*]

An act relating to the fees of county surveyors.

Section 1. That the several county surveyors of this Commonwealth shall be and are hereby authorized to charge and receive for the services hereinafter mentioned the following fees, and no more, to wit:

For receiving warrant and giving receipt for the same, if required, .	$0 25
For executing warrant, not exceeding one hundred acres, ...	4 50
For each additional one hundred acres on same warrant, ...	75
For return of survey to Surveyor General's office, [Department of Internal Affairs,]	1 00
For draft thereof to the warrantee, ...	25
For executing order of resurvey and making return thereof, same fees as for like service on original survey.	
For certifying survey made by deputy, ...	50
For each mile necessarily traveled in going to and returning from land, ...	10

EXCESS.

[*Act of 21st April, 1859. P. L., 87.*]

An act relative to returns of surveys to the office of the Surveyor General.

Section 1. That so much of the second section of the act approved the sixth day of April, Anno Domini one thousand eight hundred and thirty, as restricts returns of surveys on warrants thereafter to be issued to an amount not greater than ten per centum beyond the number of acres for which the warrant issued, be and the same is hereby repealed: *Provided*, That any excess which may be returned under the provisions of prior laws shall be paid at the time of making such return of survey to the Surveyor General, otherwise the same shall not be accepted.

[Any surplus not exceeding one hundred acres may now be returned on any warrant or order of survey, provided that the money for such surplus accompanies the return. See paragraph 12 of "Instructions to County Surveyors."]

FEES.

[*Act of 15th April, 1873. P. L., 75.*]

An act relating to the fees of the Surveyor General.

SECTION 1. That from and after the passage of this act the fees to be collected by the Surveyor General for the use of the Commonwealth shall be as follows, namely :

For warrant, including return thereof,	$5 00
Patent for five acres or less,	5 00
Patent for more than five acres,	10 00
Copy of patent,	1 00
Certificate with seal of office on patent, when mortgage is discharged,	50
Every search,	25
Calculation of money due on land, including search,	50
Caveat,	1 00
Issuing citation,	1 00
Recording application for and making order of resurvey,	1 00
Order of the Board of Property, directed by the Surveyor General to the county surveyor to be executed,	1 00
Copy of action or determination of Board of Property, with seal,	1 00
Order for valuing islands,	2 00
Entering application on petition to the Board of Property, together with the minutes thereon, for any other purpose than a resurvey,	1 00
Certified copy of a draft of a single tract, with certificate and seal,	1 00
Connecting separate drafts into one general draft, with certificates for each separate draft therein,	75
Copy of general draft of town or out-lots, for each tract of land therein described,	25
Extract from a general draft, for each tract of land therein described,	25
Copy of a draft of lots or tracts of land annexed to certificate of Connecticut claimants or others, for each tract,	75
Copy of warrant, application, or any other office right, relating to but one tract of land not hereinbefore enumerated,	50
Copy of extract from the deputy surveyor's list of returns, and all other extracts not hereinbefore recited, for each tract,	25
Copy of any record or paper or any part thereof, not included in the foregoing, for two hundred words or less,	50
And for every ten words additional,	1
Certifying and affixing seal of office to any copy, connected draft, extract, certificate, or minute,	25

SECTION 2. All laws and parts of laws inconsistent herewith are hereby repealed, so far as they relate to the fees of the Surveyor General.

Entering lien, under act of 20th May, 1864, for each tract,	$5 00

LIENS FOR UNPAID PURCHASE MONEY.

1. List of unpatented lands to be forwarded to prothonotaries.
2. Unpaid purchase money, &c., to be entered on lien docket. Interest.
3. Prothonotaries to docket descriptive lists of unpatented lands. Courts, on hearing, may strike off such entry.
4. Supplied by paragraph 10.
5. Repealed by act of April 4, 1868.
6. Graduation act of 1835, continued until November 1, 1864.
7. Attorney General to proceed on liens.
8. Time allowed to persons in the military or naval service.
9. Changed by act of April 15, 1873. [See note.]
10. Land lien dockets. Entries thereon. Fees.
11. Repeals sec. 5 of act of May 20, 1864.
12. Notice to be given when lien dockets have been forwarded to prothonotaries.
13. No suit to be entered for one year.
14. Release of liens on proof of payment.
15. Board of Property to regulate suits for unpaid purchase money. Interest not to be charged on fees.
16. Lists to be furnished to county surveyors.
17. County surveyors to give notice to owners or occupants.
18. County surveyors to make report to Surveyor General.
19. Surveys to be made of parts of original tract.
20. Suits to be by *scire facias*. Service.

[*Act of 20th May, 1864. P. L., 914.*]

An act directing the entry of liens for the principal and interest due the Commonwealth, for lands held by virtue of locations, or other office titles.

1. Section I. That it shall be the duty of the Surveyor General to make out a list of all lands held by location, or any other office right, issued from the Land Department of this Commonwealth, of every kind and description, upon which no patents have issued, designating the county in which such lands are situated, with such other descriptions of the same as the records of his office will enable him to give, including the names in which such locations or other office rights are entered, and surveys have been returned; and on the list being completed, or any part thereof, be transmitted to the prothonotary of the county in which such lands are situated.

2. Section II. That it shall be the duty of the Surveyor General to calculate the amount of purchase-money, interest, and fees, due on each unpatented tract; and after the descriptions of said tracts have been transmitted to the prothonotaries of the respective counties, and entered, as hereinafter provided, the amounts so found to be due, together with five dollars for the labor and costs of making out and filing, shall form an aggregate sum which shall be entered in a lien docket to be provided and kept for that purpose, and said sum shall bear interest at the rate of six per cent.

3. Section III. That it shall be the duty of the prothonotary of each county, upon receiving any descriptive list as aforesaid, to provide a suitable docket, with a proper index, for the purpose of recording all such descriptions of unpatented lands, and shall accurately record the same and index the name of the original warrantee or actual original settler, as the

case may be, and each subsequent owner so far as ascertained, and preserve the same among the records of the county: *Provided*, That when any party in interest, by petition under oath or affirmation, setting out the facts in the case, as in affidavit of defense, shall represent to the president judge of the court of common pleas of the county, in which any tract or piece of land, against which the entry directed in the foregoing section has been made, or the principal part thereof, may lie, that said tract has been patented, either in the name against which the entry is made, or in any other name, the said judge shall, after such notice to the Surveyor General as he shall deem proper, proceed to hear the case of the petitioner; and the said judge shall, thereupon, make such decree in the premises, either by directing the said entry to be struck from the record, or such other order as to said entry, and also as to costs, as may seem equitable.

4. SECTION IV. That it shall be the duty of the prothonotary of each county, upon receiving from the Surveyor General any such list or calculation of amounts due the Commonwealth for purchase-money, interest, and fees, to provide a suitable docket with index, in the form of the lien dockets now in use in the several counties of this Commonwealth, to be styled "Lien Docket of Unpatented Lands," and enter therein the amount so found to be due, which sum shall remain a lien upon such tract or tracts, until paid; and that a fee of fifty cents be paid to the prothonotary for each description so entered, and that he be allowed the same fees on the liens entered, as are now allowed on judgments entered by warrant of attorney in the court of common pleas.

5. SECTION V. That it shall be the duty of the prothonotary, upon receiving any such descriptive list, to cause the same to be published in two newspapers in the county where such lands are located, for three successive weeks, for which publication he shall be authorized to pay fifty cents for each tract, and charge the same as costs on the lien docket, and retain his fees and costs out of any moneys, in his hands, due the Commonwealth.

6. SECTION VI. The amounts which may be due to the Commonwealth on the lands mentioned in the first section of this act, may be paid in accordance with the existing laws in relation to such lands, if the same be paid prior to the first day of November next: *Provided*, That any costs, which may have accrued in accordance with the provisions of this act, shall also be paid, and that the act to graduate lands on which money is due and unpaid to the Commonwealth of Pennsylvania, approved April tenth, Anno Domini one thousand eight hundred and thirty five, be revived and continued in force, until the said first day of November next; and any survey and appraisements, made since the first day of August last, shall have the same validity for the issuing of patents thereon, as if the last mentioned law had been still in full force.

7. SECTION VII. That all liens due the Commonwealth for unpatented lands, after the first day of November, Anno Domini one thousand eight hundred and sixty-four, may be proceeded upon by the Attorney General

of the Commonwealth, in the manner directed to be pursued against defaulting public officers, by the act of April sixteenth, one thousand eight hundred and forty-five, and the supplement thereto.

8. Section VIII. All persons in the military or naval service of the United States, shall be allowed one year after the expiration of said service, for the taking out of any patent or patents under the provisions of this act.

9. Section IX.* That, hereafter, the patent fee, on town lots not exceeding one fourth of an acre, shall be one dollar, and on lots not exceeding two acres, five dollars.

[*Act of 4th April, 1868. P. L., 60.*]

A supplement to an act directing the entry of liens for the principal and interest due to the Commonwealth for lands held by virtue of location or other office titles, approved the twentieth day of May, Anno Domini eighteen hundred and sixty-four.

10. Section I. That in lieu of the descriptive lists provided for in said act, it shall be the duty of the Surveyor General to make out and forward to the prothonotaries of the several counties, lien dockets, to be styled "land lien dockets," containing lists of all unpatented and patented lands, situate in the counties respectively, upon which there is money due the Commonwealth, and in all cases where surveys have been returned, to enter therein the amount of purchase money, interest, and all fees due, and said aggregate shall remain a lien on such tract until paid or otherwise legally discharged: *Provided*, That the several prothonotaries shall be allowed to charge the fees now authorized by law when any information shall be desired from said records, and for entering any certificate under the seal of the Surveyor General, setting forth that any lien or part of lien against an unpatented tract has been paid, shall charge the party presenting such certificate a fee of twenty-five cents for entering and filing the same.

11. Section II. That the fifth section of the act to which this is a supplement, and so much of said act as is inconsistent herewith, be and the same is hereby repealed.

[*Act of 8th April, 1869. P. L., 21.*]

An act directing public notice to be given when county land lien dockets are forwarded to the respective counties, and staying proceedings by the Attorney General for one year from the date of forwarding the same.

Whereas, The Surveyor General, at an early day, will be prepared to send out the county land lien dockets, containing accounts due the Commonwealth on account of lands, prepared under the act approved the twentieth day of May, Anno Domini one thousand eight hundred and sixty-four, and the supplement thereto, approved the fourth day of April, Anno Domini one thousand eight hundred and sixty-eight:

And whereas, It is proper that the people owing the State, for or on account of lands, should have notice when the liens therefor are entered in the counties, and that a reasonable time should be given to enable them to liquidate their indebtedness and obtain patents for their lands, before suits shall be brought in such cases by the Attorney General; therefore,

*Section nine changed by act of April 15, 1873.

12. SECTION I. That when any county land lien docket, prepared under the foregoing acts, shall be forwarded to any county, the Surveyor General is hereby authorized and directed to cause a notice thereof to be given in one English newspaper, published at the county seat of such county, and also in one German newspaper, if there be one in said county, setting forth that the land lien docket for that county has been forwarded to the prothonotary thereof: *Provided*, That no greater sum than ten dollars shall be paid for such notice or advertisement for any one county; and on evidence being submitted to the Auditor General that such advertisement has been authorized by the Surveyor General, and inserted at the usual rates of advertising, he shall draw his warrant on the treasury in favor of the editor or publisher inserting the same.

13. SECTION II. That no suit or suits shall be entered or instituted by the Attorney General, under the provisions of the seventh section of the act of the twentieth of May, Anno Domini one thousand eight hundred and sixty-four, until one year shall have elapsed from the date at which the Surveyor General shall have forwarded to each county, respectively, the land lien docket for the same.

[*Act of 15th April, 1869. P. L., 31.*]

A further supplement to an act directing the entry of liens for the principal and interest due to the Commonwealth for lands held by virtue of locations or other office titles, approved the twentieth day of May, Anno Domini one thousand eight hundred and sixty-four.

WHEREAS, An examination of warrants and returns of survey show in many cases interferences in said returns, and in many instances where patents have issued on some of said surveys, there are balances due upon other warrants covering the same land; therefore,

14. SECTION I. That whenever satisfactory evidence shall be given to the Surveyor General that a lien or liens have been entered against lands for which the Commonwealth has been fully paid, both for land and patent fees, he is hereby authorized, and it shall be his duty, to give to the party or parties applying for the same a release of said lien or liens, so far as said patented lands are concerned; which said release may be entered on the land lien docket, in accordance with the provisions of the supplement to the act of which this is a further supplement, approved the fourth day of April, Anno Domini one thousand eight hundred and sixty-eight.

[As many persons will apply for releases under the provisions of this law, it is deemed proper to state what will be regarded as satisfactory evidence by this Department. Applicants, in order to avail themselves of the act, should cause a plot or survey of the patented tracts, and the unpatented interfering tracts, (showing the manner in which, and to what extent they cover the same land,) to be made by the county surveyor, who will certify that he has made the same at the request of A, B, and C—the owners of the patented tracts, or parts of tracts, or their agents or attorney—giving names of warrantees and dates of warrants and patents, and names and dates of warrants of the unpatented lands, and that he believes the inter-

ference or interferences to be as delineated by him. On a paper appended to the above plot of surveys, the applicant or applicants, his or their agent or attorney, will be required to make an affidavit that the interferences are believed to be as delineated by the county surveyor. A release will then be issued to the owner or owners of the patented tract or tracts, relieving them from any and all liability to pay the liens of the Commonwealth entered against such interfering unpatented tract or tracts. Section seven of the act approved the 20th day of May, 1864, invested the Attorney General with authority to proceed against the owners of unpatented lands, to enforce the payment of the arrears of purchase money, interest, and fees due the Commonwealth on said lands. This power, by the following supplement, became vested in the Board of Property.]

[*Act of 5th May, 1871. P. L., 261.*]

A further supplement to an act directing the entry of liens for the principal and interest due the Commonwealth for lands held by virtue of location or other office titles, approved the twentieth day of May, Anno Domini one thousand eight hundred and sixty-four.

15. Section I. That the Board of Property shall have full and discretionary power as to the time of entering suits and the number thereof, to be brought for the collection of liens against unpatented lands; and the Attorney General shall proceed, under the seventh section of the said act, to which this is a further supplement, when authorized to do so by the said Board: *Provided*, That no interest shall be charged on patent or other fees.

[*Act of 11th April, 1872. P. L., 51.*]

A further supplement to an act directing the entry of liens for the principal and interest due the Commonwealth for lands held by virtue of location or other office title, approved the twentieth day of May, Anno Domini one thousand eight hundred and sixty-four.

16. Section I. That for carrying into full effect the provisions of the act to which this is supplementary, it shall be the duty of the Surveyor General to make out and forward to the several county surveyors, respectively, from time to time, as the Board of Property may determine, special lists of warrantee names of unpatented tracts, or remaining parts of unpatented tracts, of lands within the several counties, as the same may appear upon the land lien dockets, with such other data relating thereto as he may deem necessary.

17. Section II. That it shall be the duty of the county surveyor of each county, to whom the Surveyor General may send special lists of warrantee names of unpatented tracts or parts of tracts of land, and other data relating thereto, situate in the county for which such surveyor shall have been elected or appointed, to endeavor to ascertain the names and residences of the owners, agents, or occupiers, and location of said tracts or parts of tracts, or any of them, and to give personal notice in writing to said owners, agents, or occupiers, that said tracts or parts of tracts are unpatented, and that unless the arrearages shall have been paid within

six months from the time of sending or serving said notice, the Board of Property may direct proceedings to be commenced by the Attorney General to enforce payment, under the provisions of the act to which this is a further supplement: *Provided*, That when unpatented lands as aforesaid are unoccupied, and the owners are non-residents of the county, and have no known agent or agents within the county, the said notice may be given by sending it by mail, addressed to the owners or agents, and directed to the post-office nearest their place of residence or usual place of business: *And provided further*, That when lands as aforesaid are unseated, and have been sold for taxes, and the time limited for their redemption has not expired, it shall be the duty of the county surveyor to give notice, in the manner hereinbefore provided, to the purchasers or their agents, and also to the parties, or their agents, who last paid taxes thereon previous to the sale.

18. SECTION III. That it shall be the duty of the county surveyor to whom such special list shall have been sent as aforesaid to make a written report in duplicate, within three months, to the Surveyor General, filing a copy of the same in the prothonotary's office of each county, setting forth the names of warrantees, dates of warrants, location of tracts, and the names and residence of the owners, agents, or occupiers of the unpatented tracts or parts of tracts, upon whom he has served the notices as aforesaid, together with the manner of service; and for serving such notices on all the owners, agents, or occupiers of an original unpatented tract, or remaining part of an original unpatented tract, he shall be entitled to a fee of five dollars, to be paid out of the State treasury, on warrants drawn by the Auditor General, upon the certificate of the Surveyor General.

19. SECTION IV. That it shall be the duty of the county surveyor, upon the reasonable request of any owner, or his agent, of part of an original tract which has not been patented, to make and return a return of survey of such part to the Surveyor General, and for which service his fees shall be the same as for executing a warrant of survey, as now provided by law for the same quantity of acres.

20. SECTION V. That when any suits shall be entered by the Attorney General, under the act to which this is a further supplement, it shall be by *scire facias sur liens*, which shall be directed for service to the sheriff of the county in which the land is situate; and if he finds it necessary to insure a service of said writ, he may call to his aid the county surveyor, who shall act as his deputy, for the purpose of serving such writ; and all such writs shall be made returnable to the court of common pleas of the county wherein such lands are situate, where all such suits shall be tried.

SECRETARY OF INTERNAL AFFAIRS.

[*Constitution, Art. IV.*]

[Section I names the Secretary of Internal Affairs as one of the Executive Department, and section 9 constitutes him a member of the Board of Pardons.]

Section XIX. [I.] The Secretary of Internal Affairs shall exercise all the powers and perform all the duties of the Surveyor General, subject to such changes as shall be made by law. His department shall embrace

[II.] A bureau of industrial statistics.

[III.] And he shall discharge such duties relating to corporations, to the charitable institutions, the agricultural, manufacturing, mining, mineral, timber, and other material or business interests of the State as may be prescribed by law.

[IV.] He shall annually, and at such other times as may be required by law, make report to the General Assembly.

Section XXI. The term of the Secretary of Internal Affairs shall be four years. * * * * * * * *

[*Art. XVII.*]

Section XI. The existing powers and duties of the Auditor General in regard to railroads, canals, and other transportation companies, except as to their accounts, are hereby transferred to the Secretary of Internal Affairs, who shall have a general supervision over them, subject to such regulations and alterations as shall be provided by law; and, in addition to the annual reports now required to be made, said Secretary may require special reports at any time upon any subject relating to the business of said companies from any officer or officers thereof.

[These provisions of the Constitution are enforced by acts of Assembly, passed in pursuance thereof, approved respectively on the 11th day of May, 1874, P. L., 135; the 15th day of May, 1874, P. L., 172 and 193; and by the following:]

[*Act of 8th May, 1876. P. L., 113.*]

A further supplement to an act regulating the election of Secretary of Internal Affairs, defining his duties and fixing his salary, approved the eleventh day of May, Anno Domini one thousand eight hundred and seventy-four.

Section I. That the Secretary of Internal Affairs and his chief clerk, who shall hereafter be designated Deputy Secretary of Internal Affairs, shall have power and authority to administer oaths or affirmations in any or all matters pertaining to the business of his Department.

Section II. All maps, drafts, reports, and other papers relating to surveys of State or county lines, State or turnpike roads, railroads, canals, or other public improvements now remaining in the office of the Secretary of the Commonwealth, and not connected with the other records of his office, shall, as soon as practicable after the passage of this act, be transferred to the Secretary of Internal Affairs, who is hereby authorized and directed to receive and deposit the same in his Department; and all such maps, drafts,

reports, and papers as are now by law required to be placed in the office of the Secretary of the Commonwealth, shall hereafter be deposited in the Department of Internal Affairs.

SECTION III. It shall be the duty of all commissions appointed to re-establish any of the boundary lines of this Commonwealth, to erect a new county, or to annex part of one county to another county, to transmit a copy of their report to the Secretary of Internal Affairs, to be by him deposited in his Department.

SECTION IV. It shall be the duty of all commissions appointed to resurvey, re-mark, alter, or change any county line, to deposit duplicate copies of their report in the office of the clerk of the court of quarter sessions of the proper county; and after the same has been confirmed by said court, the said clerk shall, upon one of the copies, certify such confirmation, and immediately transmit the same by mail to the Secretary of Internal Affairs, to be by him deposited in his Department.

SECTION V. Copies of all records, documents, entries, and papers now in the Department of Internal Affairs, or that may be transferred thereto in pursuance of this act, or that may hereafter be deposited therein according to law, shall be made and certified at the request of any person applying for the same, on the payment of the same fees as was prescribed by the fee bill for similar services in the Surveyor General's office at the time the same was merged into said Department, which fees shall be accounted for and paid into the treasury in the same manner as is now provided by law for other fees, to be collected by the said Secretary; and the said copies shall be received in evidence in the several courts of this Commonwealth, in all cases where the original records, documents, entries, and papers would be admitted in evidence.

* * * * * * * * * *

WARRANTS.

[*Act of 14th April, 1874. P. L., 58.*]

An act relative to the issuing of warrants to survey vacant lands.

SECTION I. That every applicant for a warrant to survey any of the vacant lands of this Commonwealth shall produce to the Surveyor General a particular description of the land applied for, with an affidavit of a disinterested witness, made before a justice of the peace of the township or borough in which the land applied for, or the greater portion of it, is situate, or if there be no justice of the peace in such township or borough, before a justice of an adjoining township or borough, specifying whether the said land be improved or not, and if improved, how long since the said improvement was made, that interest may be charged as now provided by law. The applicant for such warrant shall declare, upon oath or affirmation, before a justice of the peace of the township or borough in which the land or greater portion of the same is situate, or if there be no justice

in such township or borough, before a justice of an adjoining township or borough, that he verily believes that no warrant or other office right has previously issued for such land, or if one has issued, after giving full particulars in relation thereto, shall depose that he verily believes it has been abandoned; and if at any time thereafter it shall appear that the person or persons deposing, as aforesaid, or any of them, shall knowingly have sworn falsely, such person or persons shall suffer all the pains and penalties of perjury.

Section II. No warrant shall issue for any tract or piece of land on which settlement is made, or which may be either in whole or in part cleared and fenced, or otherwise improved, used, or occupied and held by defined boundaries, unless to such person or persons, respectively, who have made the settlement, clearing, fencing, or improvement, their legal representatives or assigns, upon proof of ownership of such settlement or improvement right, and if any warrant shall issue otherwise than as aforesaid, it shall be void: *Provided*, That this section shall not apply to abandoned improvements.

Section III. Every applicant for a warrant to survey vacant land shall, after filing his or their application for such warrant, and depositing the amount of the purchase money and fee with the Surveyor General, give at least thirty days' notice of the filing of said application, with a full description of the land as set forth in the application, by publication once a week for three successive weeks, in one or more newspapers of the county in which the land is situate, and nearest its location, and shall furnish proof that such notice has been given, before a warrant shall issue: *Provided*, That if any *caveat* or *caveats* shall have been entered against issuing such warrant, the same shall not issue until directed by the Board of Property; and if the Board of Property, after a hearing upon a citation issued in pursuance of any *caveat*, shall decide against issuing the warrant, the purchase money shall be returned to the applicant.

Section IV. This act shall not apply to applications for warrants filed with the Surveyor General before its passage.

PRICES OF LAND IN PENNSYLVANIA AT VARIOUS PERIODS.

Prices under Penn and His Heirs.

Previous to the 27th of December, 1762, £15 10s. ($41 33) per hundred acres, with the exception of a few warrants in the lower counties at £3 10s. ($9 33) her hundred.

From the 27th of December, 1762, to the 5th of August, 1763, £9 ($24) per hundred acres.

From the 5th of August, 1763, to the 6th of August, 1765, £15 10s. ($41 33.)

Locations and warrants from the 6th of July, 1765, to the 1st of July, 1784, £5 sterling ($22 22.)

Prices under the Commonwealth.

From the 1st of July, 1784, to the 3d of April, 1792, £10 ($26 66⅔) per hundred acres.

New Purchase of 1784.—From the 1st of May, 1785, to the 1st of March, 1789, £30 ($80.)

From the 1st of March, 1789, to the 3d of April, 1792, £20 ($53 33⅓.)

From the 3d of April, 1792, to the 1st of September, 1817, £5 ($13 33⅓) for land in the purchase of 1784, east of the Allegheny river and Conewango creek, unimproved.

Purchase of 1768 and the Previous Purchases.—From the 3d of April, 1792, to the 28th of March, 1814, at the rate of fifty shillings ($6 66⅔) per hundred acres.

Lands in the purchase of 1784, lying north and west of the rivers Ohio and Allegheny, and Conewango creek, £7 10s. ($20.)

Undrawn donation lands, from the 1st of October, 1813, at the rate of $1 50 per acre.

Donation lands reduced, from the 25th of February, 1819, to fifty cents per acre.

From the 21st of March, 1814, lands within the purchase of 1768, and the previous purchases, to be at the rate of £10 ($26 66⅔) per hundred acres.

From the 1st of September, 1817, lands within the purchase of 1784, east of the Allegheny river and Conewango creek, at the rate of £10 ($26 66⅔,) except such as have been settled on, agreeably to the act of 3d of April, 1792, between said 3d of April and 1st of September, 1817.

Seventeen townships in Luzerne county—price fixed by the commissioners: First class, $2 per acre; second class, $1 20; third class, 50 cents; fourth class, 8¼ cents.

Present Price.

The price of all vacant and unimproved land is now at the rate of £10 ($26 66⅔) per hundred acres, except the following:

Lands lying north and west of the rivers Ohio and Allegheny, and Conewango creek, $20 per hundred acres.

Reserve tracts near Erie, Waterford, &c., price fixed by commissioners.

Lands improved agreeably to the act of the 3d of April, 1792, fifty shillings, ($6 66⅔) and £5 ($13 33⅓) per hundred acres.

Lands held by Virginia warrants, in the south-west part of the State—the warrants show the terms. Lands were taken under Virginia warrants as low as ten shillings per hundred acres.

It is the practice in the Land Office to charge for the excess of land above *ten per cent.* on fifty shilling warrants, at the rate of £10 per hundred acres.

TABLES

Showing the price of from one acre to five hundred acres of land at the various rates prescribed by the Proprietary and by the Commonwealth.

Warrants at £15 10s. per cent., two per cent. interest.

Application for Unimproved Land.

. . . . . of the . . . . . of . . . . . in the county of . . . . . appl . . for . . . . . acres of land, situated in the township of . . . . . and county of . . . . . adjoining lands of . . . . .

FORM No. 91.

Application for Improved Land.

[*When date of Improvement CAN be fixed.*]

. . . . . of the . . . . . of . . . . . in the county of . . . . . appl . . . for . . . . . acres of land, situated in the township of . . . . . and county of . . . . . adjoining lands of . . . . .

FORM No. 92.

Application for Improved Land.

[*When date of Improvement CANNOT be fixed.*]

. . . . . of the . . . . . of . . . . . in the county of . . . . . appl . . for . . . . . acres of land, situated in the township of . . . . . and county of . . . . . adjoining lands of . . . . on the east, ... on the south. . . . . on the west, and . . . . . on the north.

To the Secretary of Internal Affairs of the Commonwealth of Pennsylvania. } [Applicant sign.]

. . . . . , *County, ss:*

Before me, the subscriber, a justice of the peace, in and for the township of . . . . . and county aforesaid, personally came . . . . . the above named applicant , who being duly sworn according to law, did depose and say, that he ha made diligent search and inquiry, and cannot find any persom by whom he can prove the time at which the land described in the above application was first improved, and further, that he verily believe that no warrant or other office right has been issued for said land either in own name , or in the name or names of any other person or persons under whom he claim the same.

Sworn and subscribed before me, this . . day of . . . . . 188 . . . . . , *J. P.* } [Applicant sign.]

FORM No. 94.

Proof of Notice by Publication of Application for Warrant to Survey Vacant Land.

. . . . . *County, ss:*

Before me, a justice of the peace, in and for the said county, personally appeared . . . . . , who, being duly sworn according to law, says that the notice appended, to wit: . . . .

. . . . . published at . . . . . , and that the said . . . . . is a newspaper of the county in which the land applied for is situated and nearest its location, and that the notice first appeared in the issue of said paper on the . . . . . day of . . . . . .

Sworn and subscribed before me, this . . day of . . . . . 188 . . . . . , *J. P.* } [Witness sign.]

NOTE—Extract of Act of 14th April, 1874, relative to the issuing of Warrants to Survey Vacant Land.

SECTION 3. Every applicant for a warrant to survey vacant land shall, after filing his or their application for such warrant, and depositing the amount of the purchase money and fee with the [Secretary of Internal Affairs,] give at least thirty days' notice of the filing of said application, with a full description of the land as set forth in the application by publication once a week for three successive weeks, in one or more newspapers of the county in which the land is situate, and nearest its location, and shall furnish proof that such notice has been given before a warrant shall issue.

FORM No. 95.

Application for Patent when the Present Owner CAN give a complete statement of the Title from the Warrantee, or other Person who took out the Office Right.

I, ... , of . . . . . in the county of . . . . . the present owner of . . . . . acres and . . . . . perches, and allowance of land, now situated in the township of . . . . . and county of . . . . . surveyed on a warrant to . . . . . dated the . . . . . day of . . . . . herewith forward the amount of purchase money, interest, and fees due the Commonwealth, and request that a patent shall be issued in name for the said tract.

STATEMENT OF TITLE.

. . . . . .

. . . . . .

To the Secretary of Internal Affairs of the Commonwealth of Pennsylvania. } . . . . . .

. . . . . *County, ss:*

Before me, the subscriber, a justice of the peace, in and for said county, personally came . . . . . , the above named applicant , who, being duly sworn according to law, did depose and say, that to the

best of . . . knowledge and belief, the facts set forth in the foregoing application are true; and further, that he do not know of any other person or persons claiming title to the above-described land, under the aforesaid warrantee.

Sworn and subscribed before me, this . . day of . . . . . , *J. P.* } . . . . . .

. . . . . *County, ss:*

Before me, the subscriber, a justice of the peace, in and for said county, personally came . . . . . , a reputable citizen of the township and county in which the land is situated, for which a patent is asked in the foregoing application, who, being duly sworn according to law, did depose and say, that, to the best of his knowledge and belief, the aforesaid applicant , and those under whom he claim title, have held the above-described tract of land by peaceable possession, and the exercise of ownership, for more than twenty-one years last past.

Sworn and subscribed before me, this . . day of . . . . . , *J. P.* } . . . . . .

NOTE.—Where there is more than one owner of the tract, or when the application is for part only of the original tract, the form can be varied to suit the requirements of the case.

FORM NO. 96.

Application for Patent when the Present Owner CANNOT give a complete statement of the Title of the Warrantee, or other Person who took out the Office Right.

I, ... , of . . . . . in the county of . . . . . , the present owner of . . . . . acres and . . . . . perches, and allowance of land, now situated in the township of . . . . . , and county of . . . . . , surveyed on a warrant to . . . . . dated the . . . . . day of . . . . . , herewith forward the amount of purchase money, interest, and fees due the Commonwealth, and request that a patent shall be issued in name for the said tract. And further represent, that owing to the length of time which has elapsed since the warrant was taken out, and the great number of conveyances and assurances in law vesting the title to the same unable to give a connected statement of them.

To the Secretary of Internal Affairs of the Commonwealth of Pennsylvania. } . . . . . .

The Metric System.

[The use of this system of weights and measures was authorized by an act of Congress, approved the 28th day of July, 1866.]

Measures of Length.

Metric Denominations and Values.		Equivalents in Denominations in use.
Myriameter,	10,000 meters,	6.2137 miles.
Kilometer,	1,000 meters,	0.62137 mile, or 3.280 ft. 10 in.
Hectometer,	100 meters,	328. feet 1 inch.
Dekameter,	10 meters,	393.7 inches.
Meter,	1 meter,	39.37 inches.
Decimeter,	1-10 of a meter,	3.937 inches.
Centimeter,	1-100 of a meter,	0.3937 inch.
Millimeter,	1-1000 of a meter,	0.0394 inch.

Measures of Surface.

Metric Denominations and Values.		Equivalents in Denominations in use.
Hectare,	10,000 square meters,	2.471 acres.
Are,	100 square meters,	119.6 square yards.
Centare,	1 square meter,	1550. square inches.

Measures of Capacity.

Metric Denominations and Values.			Equivalents in Denominations in use.	
Names.	No. of liters.	Cubic Measure.	Dry measure.	Liquid or wine measure.
Kiloliter or stere,	1,000	1 cubic meter,	1.308 cubic yds.,	264.17 galls.
Hectoliter,	100	1-10 of a cubic meter,	2 bu. & 3.35 pks.,	26.417 galls.
Dekaliter,	10	10 cubic decimeter,	9.08 quarts,	2.6417 galls.
Liter,	1	1 cubic decimeter,	0.908 quart,	1.0567 quarts.
Decileter,	1-10	1-10 of a cubic decimeter,	6.1022 cubic in.,	0.845 gill.
Centileter,	1-100	10 cubic centimeters,	0.6102 cubic in.,	0.388 fluid oz.
Milliliter,	1-1000	1 cubic centimeter,	0.061 cubic in.,	0.27 fluid dr.

Weights.

Metric Denominations and Values.			Equivalents in Denominations in use.
Names.	Number of grams.	Weight of what quantity of water at maximum density.	Avoirdupois weight
Miller or Tonneau,	1,000,000	1 cubic meter,	2204.6 pounds.
Quintal,	100,000	1 hectoliter,	220.46 pounds.
Myriagram,	10,000	10 liters,	22.046 pounds.
Kilogram or Kilo,	1,000	1 liter,	2.2046 pounds.
Hectogram,	100	1 decaliter,	3.5274 ounces.
Dekagram,	10	10 cubic centimeters,	0.3527 ounce.
Gram,	1	1 cubic centimeter,	15.432 grains.
Decigram,	1-10	1-10 of a cubic centimeter,	1.5432 grains.
Centigram,	1-100	10 cubic millimeters,	0.1543 grain.
Milligram,	1-1000	1 cubic millimeter,	0.0154 grain.

2. Allegheny, September 24, 1788, formed of parts of Westmoreland and Washington.
3. Armstrong, March 12, 1800, formed of parts of Allegheny, Westmoreland, and Lycoming.
4. Beaver, March 12, 1800, formed of parts of Allegheny and Washington.
5. Bedford, March 9, 1771, formed of a part of Cumberland.
6. Berks, March 11, 1752, formed of parts of Philadelphia, Chester, and Lancaster.
7. Blair, February 26, 1846, formed of parts of Huntingdon and Bedford.
8. *Bradford, February 21, 1810, formed of parts of Luzerne and Lycoming.
9. Bucks, one of the three original counties of the Province, 1682.
10. Butler, March 12, 1800, formed of a part of Allegheny.
11. Cambria, March 26, 1804, formed of parts of Huntindon, Somerset, and Bedford.
12. Cameron, March 29, 1860, formed of parts of Clinton, Elk, McKean, and Potter.
13. Carbon, March 13, 1843, formed of parts of Northampton and Monroe.
14. Centre, February 13, 1800, formed of parts of Mifflin, Northumberland, Lycoming, and Huntingdon.
15. Chester, one of the three original counties of the Province, 1682.
16. Clarion, March 11, 1839, formed of parts of Venango and Armstrong.
17. Clearfield, March 26, 1804, formed of parts of Northumberland, Huntingdon, and Lycoming.
18. Clinton, June 21, 1839, formed of parts of Lycoming and Centre.
19. Columbia, March 22, 1813, formed of a part of Northumberland.

* Previous to March 24, 1812, this county was called Ontario, but its name was changed to Bradford on that day.

20. Crawford, March 12, 1800, formed of a part of Allegheny.
21. Cumberland, January 27, 1750, formed of a part of Lancaster.
22. Dauphin, March 4, 1785, formed of a part of Lancaster.
23. Delaware, September 26, 1789, formed of a part of Chester.
24. Elk, April 18, 1843, formed of parts of Jefferson, Clearfield, and McKean.
25. Erie, March 12, 1800, formed of a part of Allegheny.
26. Fayette, September 26, 1783, formed of a part of Westmoreland.
27. Forest, April 11, 1848, formed of parts of Jefferson and Venango.*
28. Franklin, September 9, 1784, formed of a part of Cumberland.
29. Fulton, April 19, 1850, formed of a part of Bedford.
30. Greene, February 9, 1796, formed of a part of Washington.
31. Huntingdon, September 20, 1787, formed of a part of Bedford.
32. Indiana, March 30, 1803, formed of parts of Westmoreland, and Lycoming.
33. Jefferson, March 26, 1804, formed of a part of Lycoming.
34. Juniata, March 2, 1831, formed of a part of Mifflin.
35. Lackawanna, August 21, 1878, formed of a part of Luzerne.
36. Lancaster, May 10, 1729, formed of a part of Chester.
37. Lawrence, March 20, 1849, formed of parts of Beaver and Mercer.
38. Lebanon, February 13, 1818, formed of parts of Dauphin and Lancaster.
39. Lehigh, March 6, 1812, formed of a part of Northampton.
40. Luzerne, September 25, 1786, formed of a part of Northumberland.
41. Lycoming, April 13, 1795, formed of a part of Northumberland.
42. McKean, March 26, 1804, formed of a part of Lycoming.
43. Mercer, March 12, 1800, formed of a part of Allegheny.
44 Mifflin, September 19, 1789, formed of parts of Cumberland and Northumberland.
45. Monroe, April 1, 1836, formed of parts of Northampton and Pike.
46. Montgomery, September 10, 1784, formed of a part of Philadelphia.
47. Montour, May 3, 1850, formed of a part of Columbia.
48. Northampton, March 11, 1752, formed of a part of Bucks.
49. Northumberland, March 21, 1772, formed of parts of Lancaster, Cumberland, Berks, Bedford, and Northampton.
50. Perry, March 22, 1820, formed of a part of Cumberland.
51. Philadelphia, one of the three original counties of the Province, 1682.
52. Pike, March 26, 1814, formed of a part of Wayne.
53. Potter, March 26, 1804, formed of a part of Lycoming.
54. Schuylkill, March 1, 1811, formed of parts of Berks and Northampton.
55. Snyder, March 2, 1855, formed of a part of Union.
56. Somerset, April 17, 1795, formed of a part of Bedford.
57. Sullivan, March 15, 1847, formed of a part of Lycoming
58. Susquehanna, February 21, 1810, formed of a part of Luzerne.

* Part of Venango added by act approved October 31, 1866.

59. Tioga, March 26, 1804, formed of a part of Lycoming.
60. Union, March 22, 1813, formed of a part of Northumberland.
61. Venango, March 12, 1800, formed of parts of Allegheny and Lycoming.
62. Warren, March 12, 1800, formed of parts of Allegheny and Lycoming.
63. Wayne, March 21, 1798, formed of a part of Northampton.

Carried forward,	3,203,455	3,926,925	39,193	25,056,932	

TABULAR STATEMENT—Continued.

NAMES.	Population 1870.	Population 1880.	Square miles.	Acres.	County towns.
Brought forward,	3,203,455	3,926,925	39,193	25,056,932	
Union, ...	15,565	16,905	315	201,600	Lewisburg.
Venango, ...	47,925	43,370	658	421,120	Franklin.
Warren, ...	23,897	27,981	914	584,960	Warren.
Washington, . .	48,483	55,418	889	568,960	Washington.
Wayne, . .	33,188	33,513	747	478,080	Honesdale.
Westmoreland, . .	58,719	78,036	1,046	669,440	Greensburg.
Wyoming, ...	14,585	15,598	403	237,920	Tunkhannock.
York, ...	76,134	87,841	921	589,440	York.
Total, ...	3,521,951	4,282,891	45,086	28,808,442	

NOTE.—The enumeration of 1880 is classified as follows, viz: Males, 2,136,655; females, 2,146,236; native, 3,695,062; foreign, 587,829; white, 4,197,016; colored, 85,535; Chinese, 156; Indians, 184—total, 4,282,891.

☞ Pennsylvania is situated between 39 deg. 43 min. and 42 sec. north latitude, and 2 deg. 17 min. east, and 3 deg. 31 min. west longitude, from Washington. Its mean length is 280.39 miles; mean breadth, 158.05 miles; its greatest length, $302\frac{13}{40}$ miles, and greatest breadth 175 miles and 192 perches.

The latitude of Greenwich is 51 deg. 28 min. 39 sec. north, and the latitude of Washington 38 deg. 53.3 min. The longitude of Philadelphia from Greenwich is 75 deg. 18 min. west, and the longitude of Greenwich from Washington is 77 deg. 00.6 min. east.

The above statement has been taken and calculated from the best charts and tables known and accessible to this Department.

The latitude of the capitol at Harrisburg, as ascertained by recent observations made by the United States Coast Survey, is 40 deg. 15 min. 51 sec.; longitude, 40.3 seconds of time east of Washington, and 5 h. 7 min. 31.8 sec. west of Greenwich.

LIST OF COUNTY SURVEYORS

York,	Charles H. Fry.	

NOTE.—A certified copy of the oath of office taken and subscribed by each county surveyor must be filed in this Department. The act of the 9th of April, 1850, [P. L., 434,] required the oath to be administered in the court of quarter sessions of the proper county. The Constitution [Art. VII, section 1,] provides that the oath shall be administered by some person authorized to administer oaths, and be filed in the office of the prothonotary.

Those marked with an asterisk (*) hold over under the act of April 17, 1869, this Department not having been advised that successors have been elected or appointed and qualified.

† No election held. ‡ No oath filed.

LIST OF COUNTY SURVEYORS

Whose election, at the general election held on the second Tuesday of November, 1886, has been officially reported to this Department for the term commencing on the first Monday in January, 1887, and ending on the first Monday in January, 1890.

*The assessors' returns of forest and improved lands are very imperfect and cannot be relied upon. But from information derived from the surveyors of the county, and from others whose knowledge of the whole county makes them well qualified to make estimates approximately correct, we place the forest and improved lands as hereafter stated, viz: Whole number of acres in county, 473,600; whole number of acres in improvement, 47,360; whole number of acres in forest, 426,240.

COUNTY.

and timber land, and the amount at which all the real and personal property, and and the amount of taxes assessed thereon for State and county purposes, in the sev- acts of Assembly relating thereto.

Value of real estate taxable.	Number and value of horses, mares, geldings, and mules over the age of four years.		Number and value of neat cattle over the age of four years.		Value of salaries and emoluments of office, offices, posts of profit, professions, trades, and occupations.	Value of household furniture, including gold and silver plate, exceeding $300. ATTEST:
GEO. A. ELY,
Clerk.

JOHN LEAHY,
GEO. EVANS,
J. O. ROADS,
County Commissioners.

N.B.—It is estimated, by the commissioners, that the probable amount of State taxes herein assessed and uncollectible will be about 15 per cent. of the total amount.

SNYDER

Tabular Statement showing the number of taxables, the number of acres of cleared all matter and things made taxable by the laws of this Commonwealth, were valued, eral assessment districts in the county of Snyder, made pursuant to the several
